

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

# Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## **About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

# Sixty-Eighth Edition

# Statistical Abstract of the United States 1947

Compiled Under the Supervision of Morris H. Hansen
Statistical Assistant to the Director

U. S. DEPARTMENT OF COMMERCE
W. Averell Harriman, Secretary
BUREAU OF THE CENSUS, J. C. Capt, Director

## BUREAU OF THE CENSUS

.J. C. CAPT, Director

Philip M. Hauser, Deputy Director
A. Ross Eckler, Assistant Director
Howard C. Grieves, Assistant Director
Morris H. Hansen, Statistical Assistant to the Director
Ralph E. Galloway, Executive Assistant to the Director
Calvert L. Dedrick, Coordinator, International Statistics
Frank R. Wilson, Information Assistant to the Director

#### **ACKNOWLEDGMENTS**

The Statistical Abstract of the United States has been published annually for the past 68 years, and its present content and form are the result of the work of many persons during that period. Revisions are made each year to adapt it to meet current needs and uses, and to bring the various statistical series up to date. The present volume has been compiled under the supervision of Morris H. Hansen, Statistical Assistant to the Director, and Morris B. Ullman, Chief, Statistical Reports Section. Bruce L. Jenkinson is Chief, Statistical Abstract Unit. Kathleen H. Dugan is Editor, and Elma D. Beynon is editorial supervisor, of the annual volume.

The cooperation of many persons acting in either their official positions or as individuals, who contributed to the preparation of this volume, is gratefully acknowledged. The list of tables by source (pages VII-X), as well as the source note following each table, indicates the various government and private agencies cooperating in furnishing information, assisting in the selection and preparation of the material, or otherwise contributing to the preparation of the Statistical Abstract.

OCTOBER 1947.

#### INTRODUCTION

Use of the Statistical Abstract.—The Statistical Abstract of the United States presents in a single annual volume important summary statistics on the industrial, social, political, and economic organization of the United States, and includes a representative selection from most of the important statistical publications. It is, of presents, limited primarily to national data and to limited summaries by States. It does not attempt to present the great wealth of local data available from many sources.

This book is designed to serve a two-fold purpose: First, to serve as a convenient reference volume for quantitative summary information; and second, to serve as a guide various important sources of statistical data. If the user finds that the information even here on a particular subject is not sufficiently detailed for his purpose, it is expressed that he refer to the publication or the agency from which the statistics were considered for publication in the Statistical Abstract. The source of each table is given at the foot of the table. The original source usually contains additional statistical tetail, and a more complete discussion of the definitions and concepts involved, than can be presented in the Statistical Abstract; also, it may supply data for small areas. Further, the agency initially responsible for the statistics occasionally can supply still more detailed information on the basis of their unpublished tabulations or records.

1947 Edition.—This edition, the 68th annual issue of the Statistical Abstract of the United States, is designated by the year of publication. The statistics shown are the latest available in the early part of the calendar year. The time periods or dates owered by the information in the tables vary according to the practices followed by the various agencies responsible for their preparation.

Among the new features in this edition is the presentation of some graphic material. A small number of charts and maps have been included, using selection criteria similar those used in selecting the tabular material. It is planned to continue and to expand a practice in subsequent issues. Comments of users will be helpful in determining from selections of this type of material.

The availability of data from the 1945 Census of Agriculture furnished an opportunity to reorganize the material on agriculture. Data on farms are now presented in sections instead of four. New material is also included from the resurvey of forestraction connection contracts, and on new and discontinued businesses. A few additional general have also been prepared.

Fig. principal omissions are tables showing data for the Philippine Islands, since that area artained status as an independent republic on July 4, 1946. A small amount of internal on the Philippines has been retained, however, especially in the historical tables where the separation of data for that area would be difficult.

Finally, a number of changes have been made in the tabular materials with the inresidual of increasing their legibility. In particular, the width of the type page has real increased, the use of heavy vertical rules has been made uniform throughout the work, and parallel vertical rules have been inserted after additive totals.

Supplements to the Abstract.—The Statistical Abstract, as an annual one-volume projection, is of necessity limited in amount of detail shown. Businessmen, teachers, Frarians, public officials, professional workers, and others often require data for the item, counties, metropolitan areas, and other small areas as well as for the Economists, teachers, students, and others frequently need more historical formation. To meet such requests for more detail, a series of supplements to the Abstract has been initiated.

The first of these supplements, Cities Supplement—Statistical Abstract of the United States, provides 79 different items of information concerning the population, education, housing, labor force, business establishments, government finance, and climate of each of the 397 cities of the United States with 25,000 or more inhabitants in 1940. This supplement is on sale by the Superintendent of Documents, Washington 25, D. C., for 15 cents.

The County Data Book, a supplement to the Statistical Abstract of the United States, is the second in this series. This publication brings together 91 different items of information for each of the 3,099 counties of the United States, with summaries for 138 metropolitan areas defined along county lines. Broad subject headings covered are population, labor force, housing, agriculture, industry, trade, and other economic data (including bank deposits, E Bond sales, war supply contracts and war-time facilities projects). This publication is on sale by the Superintendent of Documents, Washington 25, D. C., for \$2.75.

The preliminary edition of a third publication in this series, Historical Statistics of the United States, a supplement to the Statistical Abstract, is now at the printer and should be available early in 1948. This volume brings together a large number of statistical series which extend back through time. Data are shown for each year back to 1790 or to the earliest data available for the series. In preparing this volume the Bureau had the cooperation of a special committee of the Social Science Research Council set up to advise the Director of the Census on a source book of historical statistics and of the Committee on Research in Economic History under the auspices of the Social Science Research Council.

These supplements to the Statistical Abstract have been prepared to extend the usefulness of the basic annual volume by assembling specialized material in separate books. As these supplements develop it will be possible to edit the material shown in the basic volume to emphasize recent data, while supplements will serve the more specialized needs.

Responsibility.—As implied in the title, the contents of this volume are taken from a large number of sources, as indicated in the list of agencies furnishing material. (See pages VII—X.) The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. However, the responsibility for selection of the material for the general user and for proper presentation rests with the Bureau, even though carried out with the cooperation of many technicians who have given unselfishly of their time and knowledge in order to assist the Bureau's staff in making the presentation as meaningful and useful as possible.

The cooperation of the users must also be acknowledged. Many persons have written offering suggestions for improving the presentation of the material. These letters have been most helpful and users are urged to continue to make their needs known. All suggestions will be carefully considered in planning future editions.

#### FOR ADDITIONAL INFORMATION ON DATA PRESENTED

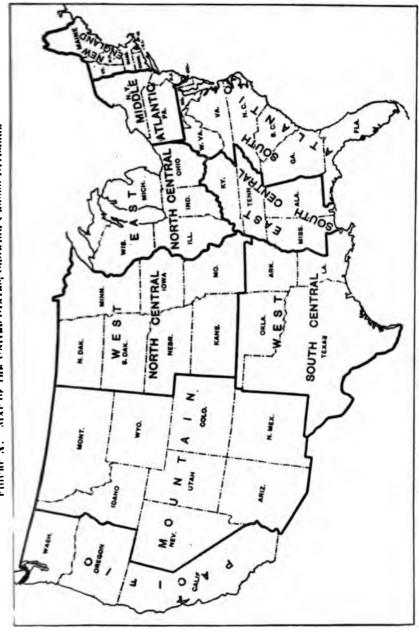

write to the agency indicated in the source note to the table which covers the desired subject.

#### SUGGESTIONS AND COMMENTS

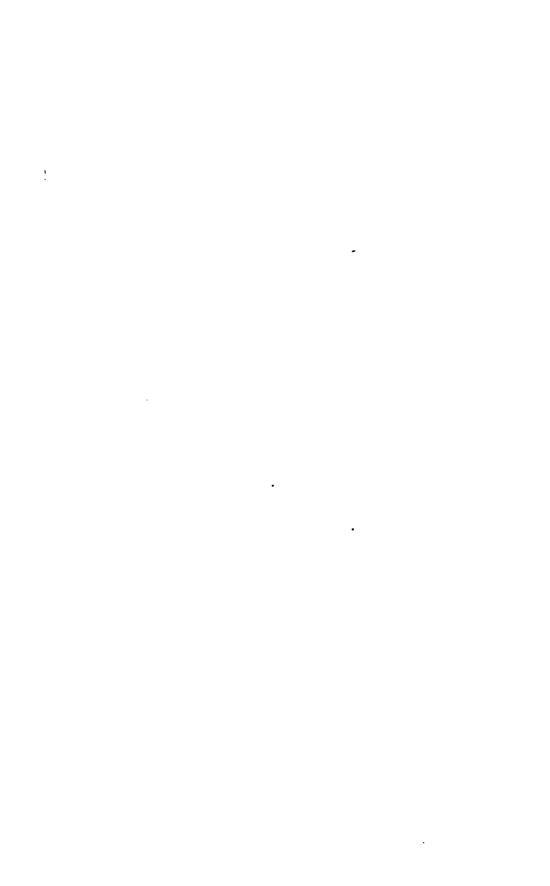

should be sent to:

The Director Bureau of the Census Washington 25, D. C.

# 1. Area and Population

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made once every ten years beginning with 1790. The data shown here were selected chiefly from the Sixteenth Census (1940), and from special census releases and reports, with the object of giving as complete a description of the population of the United States as space permits. Whenever practicable, a historical series is given in order to show changes that have occurred over periods of time. Most of the data presented apply to continental United States, but some figures for Territories and possessions are included.

Related materials are presented in other sections of this volume. Data on families are included in this section, but statistics of marriage and divorce are presented in section 2, Vital Statistics; statistics on family wage or salary income are given in section 11, Income and Expenditures; and Census data on employment and occupations are given in section 8, Labor Force. Data on the population in institutions as enumerated in 1940 are given in this section, but additional data on persons in mental institutions are given in section 2 and on prisoners in section 3, Crime and Criminals. Tables on nativity and citizenship are included in this section, but related data are included in section 4, Immigration, Emigration, and Naturalization.

Population samples.—The use of sampling methods in the Sixteenth Census permitted the collection of statistics on a larger number of inquiries than has heretofore been possible, the release of preliminary population statistics at an early date, and the tabulation of a great many social and economic characteristics of the population at a relatively low cost.

Certain tables in this section and in the related sections mentioned above are based to tabulations of samples of the population. Several samples were drawn and the sample shown were obtained by multiplying the sample results by a factor dependent on the sample size in each case. Sample B is a sample of all individuals from the 1940 F; Lation Schedule; Sample C and Sample W are samples of individual women 15 years old and over from the 1940 and 1910 Population Schedules, respectively; Sample D, a sample of families from the 1940 Population Schedule; and Sample F, a sample of families based for some subjects on 1940 Population Schedule entries, and for other serious on 1940 Housing Schedule entries. For Sample B, the sample size is 5 percent. Samples C, D, and F are 5 percent in most areas, but they include 2½ percent samples in the most populous areas. Sample W is an 8 percent sample for the North at it the South, and about 12 percent for the West.

Exact agreement is not to be expected among the various samples, nor between them and the complete count, but the sample data may be used with confidence when are numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Specifically, any number of the size of a thing, or over may be assumed to agree with a complete count within 1½ percent, then, the most numbers of this size will agree within ¾ of 1 percent. Any number of the size of 100,000 may be assumed to agree with a complete count within 4 percent, the most numbers of this size will agree within 2 percent. Most numbers as small as 10,000 will agree within 10 percent. The sampling errors in subtotals formed by without of classes are covered by the same statements. More detailed statements rearling the sampling errors are given in the original sources.

For years since 1940, several of the tables present statistics that are based on surveys conducted in connection with the Census Bureau's Monthly Report on the Labor Force. These surveys covered a representative sample of about 25,000 households taken in selected areas throughout the United States. A statement indicating the sampling reliability of estimates based on this sample is given in the Sampling Note, p. 175.

Urban and rural areas.—In the course of its history the Census has employed several definitions of urban population. The current definition was adopted in substantially its present form at the time of the 1910 census and was slightly modified at later censuses. In this edition, the urban-rural classification for all years is in accordance with the 1940 definition.

The urban area is made up for the most part of cities and other incorporated places having 2,500 inhabitants or more. In addition, it includes unincorporated political subdivisions with a population of 10,000 or more and a population density of 1,000 or more per square mile; and in the States of Massachusetts, Rhode Island, and New Hampshire, those towns (townships) which contain a village of 2,500 or more, comprising either by itself or when combined with other villages within the same town, more than 50 percent of the total population of the town.

The remainder of the population is classified as rural and is subdivided into the ruralfarm population, which comprises all rural residents living on farms, without regard to occupation, and the rural-nonfarm population, which comprises the remaining rural population.

Families.—The term "family" as defined by the Census since 1930 is limited to private families and excludes the small number (about 80,000 in 1940) of institutions and other quasi households which were included as "families" in 1920 and earlier. A private family comprises a family head and all other persons in the house who are related to the head by blood, marriage, or adoption, and who live together and share common housekeeping arrangements. The term "private household" is used to include the related family members (who constitute the private family) and the lodgers, servants, or hired hands, if any, who regularly live in the home. Thus, the number of private households is, by definition, the same as the number of private families, but the total number of persons in private households includes some individuals who are not members of private families. The term "occupied dwelling unit" is defined as the living quarters occupied by one household.

#### No. 1.—Territorial Expansion of Continental United States and Acquisi-TIONS OF TERRITORIES AND POSSESSIONS

demonstries of all territories listed under "Continental United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Adjustments have been made in the areas as remeasured in 1940]

<sup>-</sup> Fire Department of Commerce, Bureau of the Census; Sixteenth Census Reports, Population, Vol. I.

# No. 6.—Population per Square Mile, by States: 1800 to 1940

20

784

[For United States, population of continental U. S. has been divided by total land area. For each State or Territory, population at given census has been divided by land area as then constituted. However, 1930 figures are based on revised land areas used for 1940. Areas of Indian reservations, outside Indian Territory, are included in areas of States and Territories for all years; however, populations of reservations were not ascertained and therefore were not taken into account in computing densities prior to 1899]

<sup>1</sup> Based on 1940 land-area measurement.

Revised. Census of Southern States considered incomplete, but there has been no revision of State figures.
 Revised. Census of Southern States considered incomplete, but there has been no revision of State figures.
 Less than one-tenth of one person per square mile.
 Dakota Territory: Less than one-tenth of 1 in 1870, 0.1 in 1870, and 0.9 in 1880.
 Oklahoma and Indian Territory combined. Separate data are as follows: Indian Territory 5.9 in 1890 and 12.7 in 1900; Oklahoma, 2.0 in 1890 and 10.3 in 1900.

o. 7.—Estimated Population on July 1, for Continental United States, 1850 to 1946, and for Alaska, Hawaii, and Puerto Rico, 1916 to 1945

stimates, except those for continental United States, 1900 to 1946, for Hawaii, 1930 to 1945, and for Puerto Rico, 1960 to 1945, are based on interpolation or extrapolation of census figures. Estimates for continental United States, 1960 to 1900, are sums of State estimates based on available local data indicative of population change Estimates for continental United States, 1910 to 1946, and for Hawaii, 1930 to 1945, are based on births, deaths, magration, and immigration. Figures for 1917 to 1919 and 1940 to 1946 include residents of the areas serving in in sruned forces)

# No. 9.—Estimated Population on July 1, by States: 1936 to 1945

[Estimates exclude members of armed forces overseas. Based on data from 1930 and 1940 Federal consumes, State censuses, school statistics, vital statistics, registrations for war ration books, immigration statistics, and data on armed forces. For enumerated population, 1790 to 1940, see table 5, p. 6]

### No. 28.—Median Age of Urban and Rural Population, by Race and Sex: 1930 and 1940

[Definition of Median.—The median may be defined as that item which is in the middle of a series arranged according to size. Thus, the median age is that age which divides a population group into two equal parts, one half being older, and one half younger, than the median. For definition of urban and rural population, see p. 2

### No. 82.—In-Migrants and Out-Migrants, and Net Migration, by Sex, by States: 1940

In-migrants are classified by division or State of residence in 1940; out-migrants by division or State of residence in 1935. In-migrants shown here represent "migrants between States" in table 31. See head-note, table 31. Minus sign (-) denotes net out-migration]

<sup>\*</sup> Percent based on total female population.

Secret Repartment of Commerce, Bureau of the Census; special report of Sixteenth Census, Internal Magnetica, 1935 to 1940—Color and Sex of Migrants.

## No. 38.—Migration Status of the Population and Type of Migration, by Sex, for Selected Periods: 1935 to 1946

[Migrants defined: 1940—Persons 5 years old and over who lived in different counties (or quasi counties) in 1940 and 1935. A city of 100,000 inhabitants or more is treated as one quasi county and remainder of county as another. 1946—Persons who lived in different counties in 1940 and 1946. 1946 figures based on sample survey, Monthly Report on the Labor Force, see Sampling Note, p. 175]

No. 40.—Foreign-Born White Population, 1910 to 1940, and Total Foreign-BORN, 1900, BY COUNTRY OF BIRTH

[All classifications of 1940 population according to country of birth based on political boundaries of Jan. 1, 1937.

Classification of population at earlier censuses based for most part on political boundaries of those years. For most countries of Europe, total foreign-born population given for 1900 is almost entirely white]

7

Less than one-tenth of 1 percent.
 Listed as Holland prior to 1910.
 Persons reported in 1910 as of Polish mother tongue born in Austria, Germany, and Russia have been deducted from their respective countries and combined as Poland.
 Turkey in Asia included with Turkey in Europe prior to 1910.
 Includes 4,635 persons born in Serbia and 5,363 persons born in Montenegro, which became part of Yugoslavia in 1018.

in 1918.

Turkey in Asia included Armenia, Palestine, and Syria in 1910. Subsequent to 1910 Armenia included with "Other Asia."
Newfoundland included with Canada in 1900.

### .5.—MARRIAGE PROSPECTS OF SINGLE MEN AND WOMEN, BY AGE, AS COMPUTED BY LIFE TABLE METHODS

on "normal" marriage rates for 20-year period, 1920-39, and death rates for single persons in 1940. "Single" a those never marriage that is, it excludes widowed and divorced. Hence, "marriage prospects" refers sibbood of first marriage only. Table may be read as follows: 12.6 percent of all living women of age 34 ngie. Of the single women, beginning this year of age, 5.9 percent will marry before their 35th birthday; protent (including the 5.9 percent) will marry before their death. For further detail and explanation, agree publication and article by Wilson H. Grabilli, entitled "Attrition Life Tables for the Single Popula-Journal of the American Statistical Association, vol. 40, No. 231 (Sept. 1945)]

rent single within the specified year of age in 1940, except as specified in footnote 4.

This figure indicates the second within one year from attaining the specified age.

This figure indicates the second response of the second response of the second response of persons single at beginning of year of age who marry during that year and all later years. This indicates the total chance of first marriage for single persons who have attained the specified age.

This indicates the total chance of first marriage for single years not available.

Persons living in large lodging houses, hotels for transients, institutions, etc.
 Represents number of private families.

Source: Department of Commerce, Bureau of the Census; Sixteenth Census Reports, Population, Vol. IV, Part 1.

No. 48.—Families, by Race of Head, with Population per Family, Urban and Rural: 1890 to 1940

(AE Scures based on complete census. Statistics for 1900, 1930, and 1940 represent private families (or private home-bolds) only; those for 1860, 1910, and 1920 include the small number of hotels, institutions, and other quasi home-bolds. For definition of families, see p. 2]

Obtained by dividing total population by number of families (or private households); hence not strictly serge size of private families because total population includes an appreciable number of persons who are members of guass households.

Trend from one census to another, however, is practically the same as that for average of private families.

Department of Commerce, Bureau of the Census; special report of Sixteenth Census, Differential Fermitry, 1940 and 1910—Fertility for States and Large Cities.

No. 59.—GBOSS AND NET REPRODUCTION RATES, BY COLOR, BY REGIONS, URBAN AND RURAL: 1935 to 1940, 1930 to 1935, and 1905 to 1910

[Statistics for 1935 to 1940 and 1930 to 1935 based on Sample C, and those for 1905 to 1910 based on Sample W; see p. 1. Urban-rural classification is in accordance with 1940 definitions; see p. 2. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at beginning of generation were to live through their reproductive period and continue birth rates existing at time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, no improvement in mortality alone would prevent potential decline in population. Rates not shown for nonwhite in areas having, in 1940, less than 25,000 nonwhite women 15 to 49 years old]

# No. 60.—Institutional Population 14 Years Old and Over—Summary for the United States: 1940

Figures cover persons who were reported in the 1940 census as inmates of public or private institutions of specified types. Officials and attendants were excluded, as were patients in general hospitals and tuberculosis sanitarians. Persons in religious institutions and Veterans' Administration Facilities were included only if the establishment had a majority of delinquents, mental patients, aged, or incurables]

# **Vital Statistics**

# (Including health and medical care)

Vital statistics, including statistics of births, deaths, and marriages and divorces, are compiled on a national basis by the National Office of Vital Statistics, U. S. Public Health Service. Prior to the transfer of the vital statistics functions of the Federal Government on July 16, 1946, from the Department of Commerce to the Federal Security Agency, this activity was carried on in the Bureau of the Census.

Births and deaths.—The national collection of mortality statistics on an annual basis was begun in 1900. The national death-registration area for 1900 consisted of 10 States, the District of Columbia, and a number of cities in nonregistration States. The area gradually expanded in succeeding years until in 1933 it comprised the entire United States.

The national collection of birth statistics was begun in 1915 with 10 States and the District of Columbia. By 1933 all the States were included in the birth-registration area. The registration of births in 1944 was estimated to be 94.1 percent complete.

In the following tables, births and deaths for 1940 and subsequent years are shown by place of residence <sup>1</sup> of the mother or of the decedent; those for earlier years by place of occurrence of the birth or death. Statistics by place of occurrence for the entire United States do not differ from those tabulated by place of residence. Those for geographic subdivisions differ largely because of the movement of patients or prospective mothers from their homes to areas where hospital facilities are available. See table 66 for a comparison of the numbers of births and deaths tabulated by place of occurrence and by place of residence for States and table 67 for a similar comparison or cities.

Death statistics include only deaths occurring in the continental United States and exclude deaths of military personnel overseas. Stillbirths are excluded from both birth and death statistics.

In addition to the birth and death statistics, published by the Federal vital statistics agency, there are reports for the States issued by the individual State bureaus of vital statistics. Ordinarily these publications contain more details relating to the geographic and political subdivisions of the States.

Marriage and divorce.—Collections of the statistics on the number of marriages and divorces in the United States were made for the years, 1867 to 1906, 1916, 1922 to 1932, and 1937 to 1940. Estimates have been made for the intervening years and for the years subsequent to 1940. The completeness of the collection of statistics on these subjects varies considerably. Statistics for years prior to 1887 cover only about two-thirds of the counties in the United States, whereas those for the years 1922 to 1932 are based on reports for all counties. For the remaining years in which statistics were collected, more than 90 percent of all counties were covered.

In addition to statistics on the numbers of marriages and divorces, more extensive and detailed information on both marriage and divorce was collected for 1939 and 1940 from those States having central systems of registration. At the present time, records of marriages are collected centrally in slightly more than one-half of the States, and records of divorces, in about one-fourth of the States.

Birth and death rates.—Birth and death rates are based upon estimates of the midyear population. For 1940 and subsequent years, use is made of several types of population bases. Thus, birth rates for the United States are based on estimates of the

<sup>&</sup>lt;sup>1</sup> For a discussion of methods of residence reallocation and of significance of residence figures, see Vital Statistics of the United States, 1944, Part II, pp. 1-6, Washington, D. C., 1946.

total population including members of the armed forces overseas; those for States on extimates of the civilian population in the States. Death rates for the United States for these years are based on estimates of the population excluding members of the armed forces overseas; those for States on estimates of the total population, both civilian and military in the State.

Because of the unprecedented movement of the population during the war, the changes in the birth and death rates for the war years need to be interpreted with care. Part of the increase or decrease in the rates may be accounted for by the changes in the age. race, and sex composition of the population in the area. Of particular significance in this connection are: (1) the withdrawal of a large number of physically fit males of military age from the civilian population, (2) the concentration of such a population in military establishments in certain areas, and (3) the movement to overseas duty of a large number of men in the armed forces. All of these factors affect the comparability of rates for the war years with those for other years.

Merbidity.—Statistics on morbidity are compiled and published by the U. S. Public Health Service. Each State health officer reports all diseases that are required by law or regulation to be reported in his State. The lists of diseases required to be reported are not the same for each State, although the most common communicable diseases are notifiable in all the States. Tables 90 and 91 show data on these notifiable diseases. Although it is recognized that morbidity reports vary in degree of completeness of reporting of cases, these data indicate a trend by providing a comparison with similar figures for prior time periods.

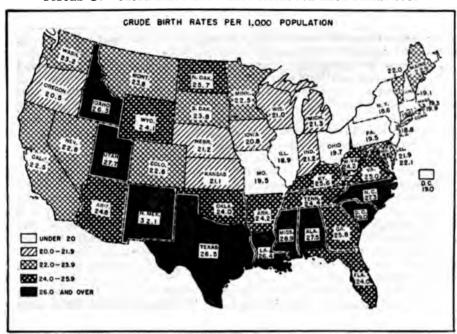

In addition, data on illnesses are obtained by special surveys. The most comprehensive survey in this field is the National Health Survey made in 1935-36. A number of reports based on this survey have been published by the U. S. Public Health Service and a few by other agencies. Reprint No. 2384 from the Public Health Reports for May 29, 1942, gives a rather complete list of publications based on the National Health Survey.

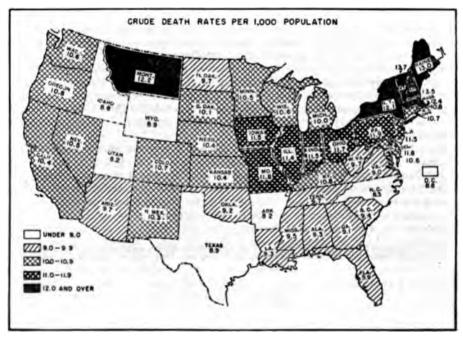

Medical care.—Annual statistics of medical care on a Nation-wide basis are limited to data on hospital facilities obtained from the annual census of hospitals and institutions conducted by the American Medical Association. Such censuses include only impitals, sanatoriums, and related institutions registered by that organization. Therefore, a relatively large number of institutions are not included in the survey. However, practically all of the large institutions in the country are canvassed with the result that most of the hospital bed facilities are usually included. During the war period, the results of the survey are less complete because figures on recently established Federal hospital facilities are lacking.

An index to one aspect of medical care is also provided by the numbers of births and ceathe occurring in hospitals and institutions. These data may be found in the Bureau of the Census publications on vital statistics. Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, and in institutions for mental defectives and epileptics. The Bureau of the Census collects each year data on the admissions, discharges, and deaths in these institutions, as well as those on the characteristics of the patient population.

For a discussion of the interpretation of crude birth and death rates during wartime, see Bureau of the Census, Security of Natality and Mortality Statistics, United States, 1943, Vital Statistics—Special Reports, Vol. 21. No. 1. 1945.

Results of a field investigation in Jefferson County, received too late for inclusion, change the percentage completeness from 85.0 to 85.2.
 Percentage is based on fewer than 100 records.
 Results of a field investigation in New York State (exclusive of New York City), received too late for inclusion, raise the percentage completeness from 98.7 to 98.9 percent.

### No. 92.—Hospitals—Summary of Growth: 1909 to 1945

[Data cover hospitals and related institutions registered by the American Medical Association. Registration is a basic recognition extended to all hospitals and related institutions concerning which the A. M. A. has no evidence of irregular or unsafe practices. Data for 1945 do not include 496 hospitals, etc. (capacity, 16,172), found unsatisfactory for registration by the A. M. A., and 101 hospitals recently opened for which registrations are panding. Certain other facilities, such as clinics, emergency stations and offices where bed care may occasionally be available as an auxiliary service are also excluded]

#### No. 101.-MARRIAGE AND DIVORCE ESTIMATES: 1887 TO 1945

[Rates per 1,000 population based on estimates of midyear population which for war years, 1917-19 and 1940-45, for marriage exclude members of armed forces overseas and for divorce include members of armed forces overseas. For 1887 to 1906, population base figures exclude counties for which marriage reports and divorce reports, respectively, were not received. Divorce figures include annulments]

<sup>1</sup> Preliminary.
2 Totals for 1941 to 1945 include estimates for areas not shown separately.
3 Data are for 22 States (including South Carolina) and the District of Columbia, for which divorce reports were received for all years, 1941 to 1945.
4 Calendar-year estimates based on fiscal-year figures for the State, and on calendar-year figures available for selected counties.
5 Under laws of South Carolina no divorces may be granted. Figures on annulments not available.
5 Incomplete.

Incomplete.
Includes estimates for counties not reporting.

#### 3. Crime and Criminals

Criminal justice is administered in the United States for the most part by State and local officers and agencies. The United States Constitution reserves to the States the general police powers and only offenses against the United States Government or those which involve the crossing of State lines or an interference with interstate commerce can be made Federal offenses by act of Congress. Consequently, unless they occur in Federal territories or reservations, or on the high seas, or are committed by members of the armed forces, the usual criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws. There are fifty separate and distinct criminal law jurisdictions in the United States, one in each of the forty-eight States, one in the District of Columbia set up by act of Congress, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State. Of course, there are among the States differences in detail and often substantial differences in the penalties provided for like offenses.

The administration of criminal justice can be divided into three parts. The first covers the activities of the police agencies, namely the investigation of crimes and the apprehension of persons suspected of committing them. This function involves agencies such as municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase of the administration of criminal justice is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State and Federal grand juries, and prosecuting court officers. The third division of criminal administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the administration of the penalty is carried our by prison, reformatory, jail, probation and parole officials.

Nearly all statistical data on crime and criminals are derived from the records and reports of the various agencies engaged in the administration of criminal law. Police statistics present the number of offenses reported, the number of persons arrested, and the offenses cleared by arrest. Arrest records provide data concerning sex, age, race, and other characteristics of the persons arrested and charged with crime. As the police agencies are largely local, a real problem is involved in collecting statistical data from the large number of such agencies. The Federal Bureau of Investigation obtains reports from police agencies and publishes information for the country as a whole in its semiannual bulletin, Uniform Crime Reports. The great majority of urban communities are now reporting to the Federal Bureau and the reports received cover more than half of the population of the United States. Information concerning offenses known to the police and the sex and age of persons arrested are shown by offense. Tables 104-107 and 111 are taken from Uniform Crime Reports. No centralized information is available on the police activities of the Federal agencies. Some information concerning the work of each Federal agency will be found in its respective annual report.

Court statistics for the country as a whole showing the number of persons prosecuted for criminal offenses and the outcome of the prosecutions are quite incomplete. In many States, an annual or biennial publication presents data on the criminal cases apposed of in the trial courts. This information may be published by the State Judicial Council or the Attorney General or some other State agency. The only national compilation of such information is made by the Bureau of the Census which annually

publishes statistical data on criminal cases disposed of in the general trial courts of twenty-four States including the District of Columbia. (See table 109.) Comprehensive information is collected on the work of the Federal courts by the Administrative Office of the United States Courts. Table 108 is prepared from the data published by that office.

Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Nearly every State publishes annual data either for the whole prison system or for each separate State institution. A national compilation of data on prisoners in Federal and State prisons and reformatories is made annually by the Bureau of the Census. Statistical information covering persons received and discharged from State prisons and reformatories in forty-six of the forty-eight States and from the District of Columbia and Federal prison systems is published annually in a comprehensive report. Tables 113–117 present data from these reports. The Federal Bureau of Prisons, in its annual report, Federal Prisons, provides as complete statistical information on prisoners as has been issued in this country. Tables 110 and 112 are from this source.

Information concerning juvenile delinquents and juvenile delinquency and the operation of many juvenile courts is collected and published by the United States Children's Bureau, Department of Labor.

Information on the prosecution and disposition of persons charged with misdemeanors and other minor offenses in the justice of the peace and municipal courts of the country is not compiled at the present time. Statistical data on such prosecutions may be found for some of the larger cities in the annual reports of the municipal court or of the municipal government. Likewise, there is no general compilation of statistical data on persons confined to county jails and local workhouses. The Bureau of the Census made a survey of jail prisoners for the calendar year 1933 and some information on incarcerated prisoners was published in connection with the 1940 decennial census but there is at present no regular compilation covering this field.

# No. 111. Anneats by Acid Chours: 1048

Pata from arrest recents, evidenced by fingerprint cards received at F. B. I. during year, are limited to instances of arrests for violations of war and municipal ordinances. Security exclusion exclass representing arrests for violations of Federal laws of representing commitments to any type of penal institution. Take do not represent all persons arrested, as functions are not forwarded to Washington for every individual taken into custody. Arrest records in lower age groups probably incomplete because of practice of some jurisalisticans not to functivity to other infenders.

1 Not in effect prior to facel year 1941.
2 Commitments under national-defense laws in effect prior to 1940 not classified separasely. Data for 1946 comprised 537 violations of O. F. A. requisitions, 381 wearing a military uniform illegally, 106 prostitution in military areas, and 138 others.
2 Figures for 1945 to 1944 are greater than those previously published because postal-laws violations, formerly above as separate offense group, have been included.

Source: Department of Justice, Bureau of Prisons; amual report, Federal Prisons, 1946.

 Offensee committed by persons 17 years of age or under upon which action was taken under Federal Juvenile Delinquency Act of 1888. Figures for facel year 1839 not available.

# No. 113.—Movement of Prisoners in State and Federal Prisons and Reformatories, by Sex: 1943 and 1944

#### 4. Immigration, Emigration, and Naturalization

Aliens or citizens arriving or departing by vessel or airplane at seaports of the United States are recorded on passenger and crew lists or manifests by officials of the transportation companies, these lists or manifests being delivered to the Immigration and Naturalization Service of the Department of Justice. Persons going by land or air between Mexico or Canada and the United States are required to enter or depart at land border stations where they are registered by officers of the Immigration and Naturalization Service. Statistics of immigration and emigration are prepared from these and other records by the Immigration and Naturalization Service.

Immigration.—Although the reporting of alien arrivals was required at an early date in certain of the colonies and original States, the continuous record of immigration to the United States begins with the fiscal year ending September 30, 1820. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the Annual Reports of the Secretary of Labor. For 1941, the Annual Report of the Attorney General contained a report on immigration and naturalization. No report was published for 1942. For subsequent fiscal years, Annual Reports of the Immigration and Naturalization Service (submitted by the Commissioner to the Attorney General) were published in mimeographed form.

Since 1820 the official immigration statistics (see table 119) have changed considerably in completeness and in the basis of reporting. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. Hawaii, Puerto Rico, and Alaska were treated as integral parts of the United States for purposes of immigration and emigration statistics beginning in 1901, 1902, and 1904 respectively. Travel between the Philippine Islands and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934.

Prior to 1868 arriving alien passengers were recorded, thereafter immigrant arrivals (i. e., omitting aliens coming for temporary stay). Subsequent to the passage of the Act of 1891 which increased the number of excludable classes, the basis of reporting was changed from arrivals to admissions (i. e., omitting aliens not permitted to enter the United States), except for the period 1895 to 1897, inclusive, when the reporting of arrivals was resumed.

Two classes of alien admissions are now reported, immigrant and nonimmigrant (see table 120). Included in the nonimmigrant class are aliens admitted under section 3 of the Immigration Act of 1924 (see table 128), returning resident aliens, students, and others. An immigrant alien is defined as an alien, other than a returning resident, admitted for permanent residence, under either quota or nonquota status. Nonquota immigrants admitted comprise immigrants born in Canada, Newfoundland, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and independent countries of Central and South America, and their wives and unmarried children under age 18 if accompanying or following to join such immigrants; relatives of citizens of the United

States (wives, husbands, unmarried children under age 21); ministers and professors who enter solely for the purpose of carrying on their vocations, and their wives and unmarried children under age 18, if accompanying or following to join such ministers and professors; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included either in the immigrant or nonimmigrant totals.

Emigration.—No official record of emigration was kept prior to July 1, 1907. Alien departures are classified as emigrant and nonemigrant (see table 120). For statistical purposes an alien emigrant is an alien resident of the United States departing with the declared intention of residing permanently in a foreign country. The nonemigrant category includes both alien residents of the United States departing for a temporary sojourn abroad, and aliens leaving the United States after a temporary stay.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of citizenship issued. Naturalization statistics were originally compiled by the Division of Naturalization of the Department of Commerce and Labor, now by the Immigration and Naturalization Service.

Alien registration.—The Act of June 28, 1940, required the registration of all aliens remaining in the United States (including Alaska, Hawaii, Puerto Rico, and the Virgin Islands) for a period of thirty days or longer. Aliens resident in the United States on August 27, 1940, were required to register on or before December 26, 1940. Aliens arriving subsequent to August 27, 1940, and not registered by the consul granting visas were required to register within thirty days of arrival. Aliens having their first or second naturalization papers were not exempt from the registration requirements, but those whose petitions for naturalization were pending and who expected to be naturalized prior to December 26, 1940, were instructed not to register. Registration was not required of officials of foreign governments and members of their families. Persons whose citizenship status was not clearly defined were advised to register.

The reported total of alien registrations includes registrations during the period August 27 to December 26, 1940, together with subsequent registrations of aliens who extered the United States prior to January 1, 1941. The total does not include seaman registrations.

#### No. 128.—Immigration, by Country of Origin, by Decades: 1851 to 194

[Data are totals, not annual averages, and are for periods ending June 30, except as noted. From 1881 to figures represent alien passengers arriving; for 1868 to 1891 inclusive and 1895 to 1897 inclusive, immigrant a arrivals; for 1892 to 1894 and for 1898 to the present time, immigrant aliens admitted. Data prior to 1995; to country whence aliens came; thereafter, country of last permanent residence. Because of boundary cha and changes in list of countries separately reported, data for certain countries not comparable throughout]

<sup>1</sup> Jan. 1, 1851 to Dec. 31, 1860; and Jan. 1, 1861 to June 30, 1870.
2 Includes Serbia and Montenegro prior to 1920.
3 Known as Irish Free State, 1922-1927.
4 Austria included with Germany after 1937.
5 From 1890 to 1919 Poland is included with Austria-Hungary, Germany, and Russia.
6 Included in "All other countries" in 1892; in "Other Asia" in 1893 and 1894.
7 Included in "All other countries" in 1892; in "Other Asia" in 1893 and 1894.
8 Immigrants from Canada, Newfoundland, and Mexico not reported from 1886 to 1893, inclusive.
9 Included in "All other countries" in 1892 and 1893.
10 Includes 32,879 persons returning to their homes in the United States. After 1906 such aliens have been cluded in immigration statistics as nonimmigrants; prior to that year, aliens were recorded by countries whe they came (see headnote).

No. 124.—Immigrant Aliens Admitted and Emigrant Aliens Departed, by Country of Last or of Future Permanent Residence: Years Ended June 30, 1942 to 1946

No. 127.—Annual Quotas Allotted and Quota Immigrants Admitted, by Quota Country or Region: Years Ended June 30, 1925 to 1946

Number of aliens admitted annually of any nationality subject to the quota law was limited by Immigration Act of 1971 to 3 percent of number of foreign-born of such nationality resident in continental United States as descripted by 1910 census; and by population plan of act of 1924, to 2 percent according to 1890 census. National argins clause of 1924 act, effective July 1, 1929, provided that quota of any nationality be computed by applying to 199,000 the ratio between calculated number of inhabitants in continental United States in 1920 owing their gright to nationality concerned and the total inhabitants in the United States of all nationalities subject to quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, we table 97, Statistical Abstract, 1932.) Under 1924 act, minimum quota is 100; for nonquota classes, see general note, p. 104]

¹ Persons born in colonies, dependencies, or protectorates, or portions thereof within barred zone, of European countries, who are admissible under immigration laws of United States as quota immigrants, are charged to quota a country to which such colony or dependency belongs or by which it is administered as a protectorate. Aliens who obtain wisse during latter part of fiscal year may be admitted in following year since visas are valid for period of 4 months. Nationality for quota purposes does not always coincide with actual nationality (Sec. 12, Immigrataon Act of 1924).

Source: Department of Justice, Immigration and Naturalization Service; Annual Report, releases.

tion Act of 1924).

1 Revisions from 1922 or 1922 allotments for certain countries were made due to changes in boundaries or other adjustments. Quota immigrants admitted, 1922 to 1924, as follows: 1922, 243,953; 1923, 335,480; 1924, 357,642. For admissions by countries see the 1934 and previous issues of the Statistical Abstract.

1 Quota was 153,774 from 1934 to February 8, 1944, when quota of 105 Chinese, authorized by act of December 17. 1943 increased the maximum quota to 153,879. Total quota for 1930 and 1931 was 153,714; for 1932 and 1933, 153,931; the Soviet Union's quota was 2,784 for 1930 and 1931, and 2,701 en 1932 and 1933; Rumania's, 295 prior to 1934. There were also changes in 1932 and 1933 for certain countries included in "Other Europe," Asia, and to 1994. There Pacific Islands.

<sup>\*</sup> Err known as Irish Free State, 1922 to 1927. All Ireland included with Great Britain prior to 1925; there-

aber, Northern Ireland only.

For 1928 to 1945, Austrian quota included with German.

#### 5. Education

Data on school attendance and on highest grade of school completed were obtained for each person in the United States as part of the 1940 Census of Population (see tables 137–145). The Biennial Survey of Education, conducted by the U. S. Office of Education, covers enrollment and attendance, teaching staff, finances, and other information on public education facilities at all levels, with less complete information for private schools (see tables 146–165). Other statistical studies of the U. S. Office of Education, publications of the National Education Association, Annual or Biennial Reports of the State Departments of Education, and educational journals are the other chief regular sources of statistical materials in the field of education. Many special studies are made by research divisions of city school systems, by schools of education in colleges and universities, and by educational foundations.

Educational statistics for individuals.—The school attendance statistics compiled from the 1940 Population Census are based on the replies to the enumerator's inquiry as to whether the person had attended, or had been enrolled in, any regular school or college between March 1 and April 1, 1940. Night schools, extension schools, or vocational schools are not included unless they are a part of the regular school system; and no correspondence schools are included.

The same census, for the first time, included a question on the formal educational attainment of each person, that is, the last full grade that the person had completed in the regular school system—public, private, or parochial school, college, or university. This question replaced the inquiry on illiteracy included in previous censuses. Several tables are included summarizing the educational statistics in terms of the median year of school completed. The median year of school completed may be defined as the year which divides the population group into equal parts—one-half having completed more schooling and one-half having completed less schooling than the median. The completion of the first year of high school is indicated by 9 and of the last year of college by 16. For the sake of comparability, the first year of high school is uniformly represented by 9, although there are some areas with only 7 years of elementary school.

Statistics for schools.—Working through national committees since 1910, the U. S. Office of Education, in cooperation with the State departments of education, has brought about a considerable degree of uniformity in recording and reporting educational statistics and a similar movement has been in progress with institutions of higher education since about 1930, the U. S. Office of Education serving as a clearing house for uniform procedures in records and reports.

The statistics presented in the Abstract from the Biennial Survey of Education include current national totals and summaries for a period of years. totals are reasonably complete for the types of education covered but data are not included for private schools of art, music, drama, etc., for private trade and vocational schools or private correspondence schools. The introduction of the junior high school, which includes the 7th and 8th grades from the traditional elementary school and the 9th grade from the regular high school, has made it impossible to compare elementary school or high school data over a period of years except on the basis of grade enrollment, 8 grades as elementary and 4 grades as secondary. Similarly the change in status of a large number of normal schools and teachers' colleges to State colleges and universities makes comparison of normal schools and teachers' colleges over a period of years nonrepresentative of the complete teacher training field. Detailed statistics on the major fields of education are published in the reports of the Biennial Survey Information on vocational education is compiled by the U.S. Office of Education (see tables 166-169). Data on vocational rehabilitation are compiled by the Office of Vocational Rehabilitation (see table 170).

Data in this section relate to continental United States except as noted.

### CO. 137.—Persons Attending School by Single Years of Age From 5 to 20, By Sex: 1910 to 1940

Examples for 1940 are based on attendance at or enrollment in any regular school or college, including night schools, extension schools, or vocational schools, if part of regular school system. Excludes correspondence schools. In the 3 prior consuses, school attendance question not restricted as to type of school or college. In 1940, exciton referred to period between Mar. 1, and Apr. 1, 1940, in 1930, to period between Sept. 1, 1929, and Apr. 1, 1930; and in 1920 and 1910, to period between preceding Sept. 1 and census date (Jan. 1)]

Census enumeration as of June 1, 1870 to 1900; Apr. 15, 1910; Jan. 1, 1920; Apr. 1, 1930 and 1940.
 Excluding population of Indian Territory which is not covered by public-echool statistics, and also, for 1890, population of Indian reservations. These were not enumerated at censuses prior to 1890.
 Current expense, capital outlays, and interest.
 Census estimates for July 1.
 Beginning 1920, based on total number of teachers, supervisors, and principals.
 Beginning 1920, excludes data for night, summer, part-time, and continuation schools separately reported.

Source (except for population statistics and estimates): Federal Security Agency, Office of Education; Biennial Survey of Education, chapter on Statistical Summary of Education and chapter on Statistics of State School Systems.

No. 147.—Public Elementary and Secondary Schools—Number, Enrollment, and Attendance, by States and Outlying Areas 1944

[Includes data for kindergartens. Excludes data for residential schools for exceptional children, observation and practice schools, and preparatory departments of colleges and universities]

No. 166.—Vocational Schools and Vocational Teacher-Training Courses, Federally Aided—Number of Teachers and Students, by Class of School or Course and by Sex: Years Ended June 30, 1920 to 1945

[Institutions Federally aided are reimbursed from Federal funds provided under act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending benefits of vocational education to Alaska, Hawaii, and Puerto Rico, and providing for further development of vocational education. These acts, administered by Office of Education provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education. Includes data for Hawaii beginning 1930, for Puerto Rico beginning 1936, and for Alaska beginning 1937]

In the program of Vocational Training for War Production Workers: (a) Supplementary courses provide training for persons already employed in occupations essential to the war; (b) Preemployment courses provide training for persons preparing for employment in occupations essential to the war.

In the Food Production War Training Program courses are provided to give training in food production and conservation, mechanics, farm machinery repair, and farm labor training.

In the Engineering, Science, and Management War Training Program courses are provided to meet the shortage of engineers, chemists, physicists, and production supervisors in fields essential to the war.

No. 170.—Vocational Rehabilitation of Disabled Persons, by Number Rehabilitated and in Process of Rehabilitation, by States, and for District of Columbia, Hawaii, and Puerto Rico: 1930 to 1946

[The Vocational Rehabilitation Amendments of 1943 (Public Law 113) expanded Federal-State program for vocational rehabilitation of civilians injured in industry or by accident or illness, or impaired by congenital defect. Scope of services now includes any services necessary to render disabled persons employable or to become more advantageously employable. Program is in operation in the 48 States, the District of Columbia, Bawaii, and Puerto Rico. Figures given relate to cases aided by Federal and State funds. Total expenditures in 1946 (fiscal year) comprised: Federal funds \$10,002,239; State funds \$3,747,250 (subject to final audit)]

# 6. Climate

Climatological data are gathered by the United States Weather Bureau at about 5,500 stations, of which number about 500 have automatic or hourly readings and the remainder one observation a day. There are few records in existence for stations before 1871, although some earlier and less detailed records began in the 18th century. The length of record shown in the tables is that obtained at the station's present location.

The following tables contain data from a list of cities selected to give a general representation of the climate over the United States. The average mean-temperature values have been adjusted occasionally to those of other long-record stations in the vicinity, in order that they might be representative of conditions in the local area. In all other tables the averages represent the arithmetic means of the period of record at the present station location within each city. Relative humidity averages are based on 3 to 4 daily observations.

The number of degree days as used in table 183 is the average monthly sum of the positive differences between 65° and the daily mean temperatures. Experience has shown that, in order to heat buildings to a temperature of approximately 70°, the amount of fuel or heat used per day is proportional to the number of degrees the average outside temperature falls below 65°. The degree-day value is based on this assumption.

## 7. Public Lands

The term "public lands," as used here, includes only those Federally owned lands to which the general body of public land laws apply. (See title 43 of the Code of Federal Regulations.) In general, it includes the lands acquired by the United States through cession and treaty and certain other lands declared by the Congress specifically to be "public lands," that is, subject to the public land laws. As a general rule, it excludes lands acquired by the United States from private owners and from State and local governments by purchase, donation, condemnation, etc. The term "Indian lands," used here to differentiate such lands from other public lands, refers to lands ceded to the United States by Indian tribes and held in trust for the Indians by the Government.

An entry or selection is a claim to a given tract of public land. An original entry or selection is a claim allowed under the law but subject to certain conditions before title can pass. A perfected entry is a claim finally approved after required lapse of time and compliance with other conditions. A patent or certification is an instrument of conveyance or grant to a claimant whose entry or selection has been finally approved.

For table on trend in land utilization, see p. 588.

## 8. Labor Force, Employment, and Pay Rolls

The various series of labor statistics covered in this section may be classified as of one of two types and these types differ somewhat in concept and purpose. One type of labor statistics is obtained by the "population approach," and includes data from the Census of Population and the Monthly Report on the Labor Force of the Bureau of the Census. These surveys involve an enumeration of individual persons and obtain information on employment activity from workers or members of their households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period. The population approach permits a direct enumeration not only of employed persons but also of unemployed workers, the self-employed, domestic servants, service trade workers, and others who are not found on the pay rolls of any establishment.

The second type of labor statistics is obtained by the "establishment approach," and includes data from the monthly series of the Bureau of Agricultural Economics of the Department of Agriculture and of the Bureau of Labor Statistics. These data are similar to those provided by the Census of Manufactures and other industrial censuses in that they are based on reports from employers; i. e., farms, businesses, or industrial establishments. In adding together reports of different employers the establishment approach counts twice or more any worker who works for two or more employers during a given pay-roll period, but permits a better analysis of such data as wages, hours. labor turn-over, and industry affiliation which can be more accurately obtained from employers' records than by inquiries directed to a worker or a member of his household. Because the coverage of all employees of an establishment in a single report provides information on a large number of workers in a specific industry, the establishment approach is particularly adapted to the measurement of short-term changes in employment for many important industries. However, the methods usually used in the collection of statistics from establishments do not provide for adequate representation of new establishments coming into business and thus may yield estimates of employment that are subject to a cumulative bias which becomes more serious in the measurement of long term changes. It has been the practice to correct for this bias by periodic adjustment to "benchmark" data from industrial censuses, tabulations of employer reports obtained in connection with Social Security programs, and other sources. In manufacturing, this bias is anticipated by correcting the current figures on the basis of past experience.

The labor force as now commonly defined in surveys utilizing the population approach includes persons 14 years old and over who had a job or were seeking one during a specified week. (For detailed definitions of various work status classes, see footnotes to table 196.) Population censuses earlier than 1940 used instead a concept of "gainful workera." This differed from the labor force concept in that it included all persons 10 years old and over who reported a gainful occupation, regardless of whether or not they were working or seeking work at the time of the census, and excluded in general new job seekers without previous experience in a gainful occupation. The Decennial Census of Population provides detailed data for the United States as a whole and for each State, city, and other area, including personal characteristics (sex, age, color, etc.) of the labor force, the numbers employed and unemployed, the number reporting themselves in each occupation and in each industry, and other items. The data presented from the Monthly Report on the Labor Force include national totals.

<sup>!</sup> See Estimates of Labor Force, Employment, and Unemployment in the United States, 1940 and 1930, Sixteenth Census of Population. Table 197 in the Abstract presents 1940 and 1930 data adjusted insofar as possible to a comparable basis.

by sex and age, of the number of persons in the civilian labor force, the number employed in nonagricultural industry, the number employed in agriculture, the number unemployed, and the number of nonworkers. Data on hours of work are also provided. The report is based on a monthly enumeration of approximately 25.000 households throughout the United States.

The establishment-type series are available for both agricultural and nonagricultural employment. Agricultural employment estimates have been issued since 1909 by the Department of Agriculture. These estimates are obtained by means of monthly mail returns from crop reporters.

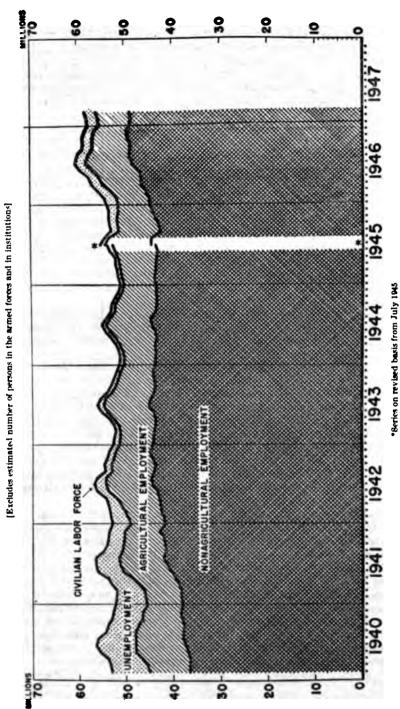

The monthly estimates of employment in nonagricultural establishments prepared by the Bureau of Labor Statistics are based on voluntary reports from about 150,000 establishments in 154 manufacturing industries and in selected nonmanufacturing industries. supplemented by data from other government agencies and adjusted at intervals to data from tabulations of reports under Social Security programs. These estimates exclude proprietors of unincorporated businesses, self-employed persons, domestic -crvants, and unpaid family workers, most of whom cannot be easily covered by the establishment approach. Persons in the armed forces are also excluded. mates are available in considerable detail, especially for manufacturing industries. They are paralleled in most instances by estimates of wage-earners separate from salaried - imployees, and for the former group there are estimates of wages, hours, and weekly and hourly earnings. The industry classifications are generally based on the major prewar activity of each employer, and have not been changed to reflect wartime conversion.

For government and certain other segments of employment, the employment reports of the Bureau of Labor Statistics are supplemented by data from the Interstate Commerce Commission, the Maritime Commission, the Civil Service Commission, the Bureau of the Census, and other agencies.

Labor turn-over estimates are published monthly by the Bureau of Labor Statistics for 76 industries in 20 major divisions in manufacturing, and for selected nonmanufacturing industries, on the basis of voluntary reports from 9,000 firms. There are a number of significant differences between the turn-over data and the Bureau of Labor statistics employment and pay-roll reports. The turn-over data now relate to all employees whereas the employment and pay-roll estimates for detailed industry groups refer generally to wage earners only. The turn-over series are based on data covering the entire month rather than the pay-roll period ending nearest the middle of the month. Further, in the turn-over series the establishments are now classified according to current industry, while the prewar industrial classification has been maintained in the employment and pay-rolls statistics.

Statistical data on work stoppages due to labor-management disputes cannot be collected in the same fashion as other labor information since such stoppages are sporadic and cannot be covered by a routine periodic reporting service. The basic measures in strike statistics as now compiled by the Bureau of Labor Statistics are the number of stoppages, the number of persons on strike, and the number of man-days of idleness involved. Questionnaires are sent to all parties concerned in each strike employers, unions, and any interested outside agent, such as a conciliator) to obtain detailed and authentic information. From the data given on the schedules, the Bureau prepares annual reports (published in the May Monthly Labor Review and later in it alletin form) which give not only the complete and verified total figures for each month of the year but also analyses on strikes by industry, State, city, and by causes, results, labor organizations involved, and other pertinent classifications.

Includes (a) persons at work—persons who worked for pay or profit at any time during the week of Mar. 24-30, 1440, in private work or nonemergency Federal, State, or local government work or assisted without pay on a family business; and (b) persons with a job but not at work—persons not actually at work and 2.11 seeking work during the week of Mar. 24-30, 1940, but with jobs, businesses, or professional enterprises from which they were temporarily absent because of vacation, illness, industrial dispute, bad weather, or lay-off not receeding 4 weeks with definite instructions to return to work on a specific date. The category Employed (except on paths emergency work) includes not only employees but also proprietors, farmers, other self-employed persons, and unpublished workers.

Source: Department of Commerce, Bureau of the Census; Sixteenth Census Reports, Population, Vol. III.

and unpaid family workers.

Includes persons who during the week of Mar. 24-30, 1940, were at work on, or assigned to, public emergency work projects conducted by the Work Projects Administration (WPA), the National Youth Administration NYA; the Civilian Conservation Corps (CCC), or State or local work relief agencies. In the interpretation of the data for persons on public emergency work, allowance must be made for the misclassification in the census as public emergency work in the United States was 2,529,600, whereas the number of persons reported in the census as public emergency work in the United States was 2,529,600, whereas the number recorded on the pay rolls of the reference work agencies at about the time of the census was 2,000 fee excluding the NYA Student Work Irvaram, and 3,377,978 including that program. The most common type of misclassification was the reporting the emergency workers as At work. Persons on the NYA Student Work Program were very frequently returned as in school and not in the labor force. There is also evidence that a considerable number of emergency workers were classified as Seeking work.

Includes persons without work of any sort in the week of Mar. 24-30, 1940, who were actively seeking work

Includes persons without work of any sort in the week of Mar. 24-30, 1940, who were actively seeking work carring that week. This category is composed of both experienced and new workers, the latter being persons who as not previously worked full time for 1 month or more.

No. 197.—Estimated Number of Persons in the Labor Force, 1930, and Adjusted Number in the Labor Force, 1940, by Employment Status, by Age and Sex

[Figures in thousands. Figures for 1930 in this table are estimates according to the 1940 employment status classification. An allowance was made in each age group for persons whose age was not reported in the 1930 census. Figures for 1940 in this table show revised data adjusted to take account of the misclassification of public emergency workers in the census returns (see note 2, table 196) and of persons whose employment status was not reported in the census. Since the revised and estimated data in this table are not available by occupation, industry, class of worker, race, or other characteristics, for more detailed age groups, or for areas other than the United States as a whole, it is necessary to use unrevised figures for the labor force in 1940 and for gainful workers in 1930 and earlier years, as shown in tables 196, 198-200, 204-211]

Figures for 1900 to 1930 represent gainful workers, that is, persons reported as having a gainful occupation in which they earned money or a money equivalent, or in which they assisted in the production of marketable goods, regardless of whether they were working or seeking work at the time of the census. Figures are, therefore, not strictly comparable with those in the labor force for 1940, shown in table 196 and in following tables.

Including data for age unknown.

Includes persons who had a job or business, but who did not work at all during entire survey week because of illness, bad weather, vacation, labor dispute, or because of temporary lay-off with definite instructions to return to work within 30 days of lay-off. Excludes unpaid family workers.

2.4 verage is an arithmetic mean computed from a distribution of single hours of work. Persons who had a but did not work during survey week excluded in computing mean.

Source: Department of Commerce, Bureau of the Census; monthly figures, except averages, published in the Monthly Report on the Labor Force.

#### Sampling Note

In the fall of 1945, the sample used for the Monthly Report on the Labor Force consisted of approximately 20,000 households living in 125 counties and independent cities grouped in 68 areas and located in 42 States and La District of Columbia. The chances are about 2 in 3 that relative errors of the estimated totals presented from the labor force survey are less than the following:

	Civ	vilian labor fo	roe	Not in
SRI	Total	Employed	Unem- ployed	the labor force
ii-xh sexes. Male Female.	1.0 1.0 2.5	1.0 1.0 2.5	9. 0 9. 0 10. 0	2.0 2.0 1.0

The relative errors presented represent the differences to be expected between totals estimated from the sample and those that would have been obtained by a complete census following the same procedures. The sampling errors themselves are subject to variation in different time periods, and particularly as the magnitudes being estimated change in level.

Less than 100,000 persons.

No. 204.—Employment Status of the Population 14 Years Old and Over, by States: 1940

## No. 207.—Detailed Occupation of Persons in the Experienced Labor Force and of Employed Persons (Except on Public Emergency Work), by Sex: 1940

Persons in the experienced labor force comprise employed persons (except on public emergency work), persons on public emergency work, and workers seeking work who had formerly worked full time for 1 month or more, see footnotes on table 196. Occupation figures shown below for employed (except on public emergency work) refer to the occupation in which engaged during census week, and are based on complete census returns. Occupation figures for remaining experienced labor force groups, not shown separately in this table, refer to the occupation which the person regarded as his usual occupation and at which he was still physically able to work, and are based on Sample B, see p. 1. Figures for "Experienced labor force," therefore, represent a summation of figures for current and usual occupation based on complete census returns and Sample B, respectively]

<sup>&</sup>lt;sup>1</sup> Comprises a summation of the complete count of present occupations for employed persons (except on emergency work) and of the tabulations from Sample B (see p. 1) of usual occupations for persons on emergency work and for experienced workers seeking work. For definitions of these labor force groups, see footnotes on table 196. Figures include the distribution of 402,270 workers deducted from the semiskilled group; for detailed explanation, see source.

Comparable figures not available.

## No. 210.—Detailed Industry of Persons in the Experienced Labor Force, and of Employed Persons (Except on Public Emergency Work), by Sex: 1940

[Persons in the experienced labor force comprise employed persons (except on public emergency work), persons on public emergency work, and workers seeking work who had formerly worked full time for 1 month or more; see isotnotes on table 195. Industry figures shown below for employed (except on public emergency work) refer to the industry in which engaged during census week, and are based on complete census returns. Industry figures for remaining experienced labor force groups, not shown separately in this table, refer to the industry in which the person was engaged when employed at his usual occupation and at which occupation he was still physically able to work, and are based on Sample B, see p. 1. Figures for "Experienced labor force," therefore, represent a summation of figures for current industry and usual industry which in turn are based on complete census returns and Sample B, respectively]

Figures for years prior to fiscal year ending June 30, 1934, are approximate.
 July 16, 1885, to Jan. 15, 1884.
 Jan. 16, 1884, to Jan. 15, 1885.
 Excludes 68 employees occupying classified positions in Administrative Office of U. S. Courts.
 Revised.
 Includes War Service appointments, temporary, etc.

No. 226.—Injuries to Civil Employees of the United States and Claims Received Under U. S. Employees' Act: Sept. 7, 1916, to June 30, 1946

[The U. S. Employees' Compensation Commission, created by act of Sept. 7, 1916, and now known as the Bureau of Employees' Compensation is charged with the duty of administering the law providing compensation for civil employees of the United States who suffer personal injury while in the performance of official duties. This table does not include data for Civilian Conservation Corps employees of for persons employed as civil employees of the United States on work relief projects financed through funds provided by the several Federal emergency relief appropriations, excepting those administrative employees who are eligible for benefits under the act of 1916]

# No. 229.—Average Hours and Earnings in 25 Manufacturing Industries: 1925 to 1945

[Data cover a representative number of plants which employed 2,200,000 workers during 1945. Earnings computed by weighting average earnings in each industry according to relative importance of the industry as shown by the Federal Blennial Census of Manufactures for 1923. In addition, each labor group is weighted according to its relative importance in each industry during the 3-year period 1927-29, as indicated by the Conference Board's studies. Pay roll data are based upon the first full week in each month, or, if a generally recognized holiday falls in that week, upon the succeeding week. Hourly earnings are not wage rates, because they include overtime and other monetary compensation!

<sup>&</sup>lt;sup>1</sup> No allowance for special rates of pay for work done on major holidays. Estimates for Jan., July, Sept., and Nov., therefore, may not be precisely comparable with those for other months in which important holidays are seldom included in pay periods for which manufacturing establishments report. This characteristic does not appear to invalidate comparability of figure for Jan. 1941 with those for preceding and following months.

### No. 282.—Percent of Increase in Urban Wage Rates, by Industry Group: APRIL 1943 TO APRIL 1946

[Intended to measure changes in basic rates of pay. Based on changes in hourly wage rates (average hourly carnings in ease of incentive workers) exclusive of all premium payments for overtime and for work on second or third shifts. Information collected through semiannual field visits to about 6,600 representative establishments, located in 69 wage areas centering in cities of 25,000 or more population. Data refer to important manufacturing industries in each area and to a standard group of nonmanufacturing industries in all areas. Minus sign denotes decrease]

October 1945 estimates revised on basis of more precise data obtained in connection with April 1946 survey. Previously published October estimates were obtained from a survey of 18 of 69 cities usually represented in the Burcau's Indexes of urban wage rates.
Prepresentation inadequate to show percent of change.

Source: Department of Labor, Bureau of Labor Statistics; November 1946 Monthly Labor Review.

I Less than a tenth of I percent.

<sup>\*</sup> Data not available.

\* April 1945 to April 1946. Does not include effect of 4-cent second-shift and 6-cent third-shift differentials introduced in 1945. Inclusion of shift differentials would bring increase in urban wage rates between April 1945 and April 1946 to 15.4 percent.

\* October 1943 to April 1946.

No. 283.—Average Hours and Earnings of Production Workers in Selected Nonmanufacturing Industries: 1989, 1944, and 1945

lessed on monthly data supplied by cooperating establishments covering both full-time and part-time employees.

As not all reporting firms furnish man-hour data, average hours and average hourly earnings for individual industries are based on slightly smaller sample than weekly earnings]

New series established April 1945; annual average data for 1945 not available.
 Excludes messengers and approximately 6,000 employees of general and divisional headquarters, and of cable employees.
 Not available.

<sup>4</sup> Cash payments only; additional value of board, room and tips, not included.

# No. 235.—Indexes of Union Wage Rates and Weekly Hours in Selected Trades: 1915 to 1946

[Data for earlier years cover 20 cities. Coverage gradually extended until 75 cities were included. Prior to 1936 figures based upon scale prevailing May 15 each year. Prom 1938 to 1942 study made as of June 1, except for building trades rates in 1942, made as of July 1. Since 1943 data collected as of July 1 for all trades. Relative wages are percentages which indicate change in basic wage rates per hour. Relative hours are percentages showing change in regular full-time hours per week, account not being taken of loss of time from slack work or other causes, nor of overtime work]

[Rates and hours for 1939 - 100]

<sup>&</sup>lt;sup>1</sup> Data on hours and earnings on Federal projects reported by accounting months rather than calendar months, and since pay periods are not uniform in any given month, some contractors report data for 4 weeks and others for 5. Consequently, average bours and earnings cannot be accurately computed by weeks and figures for average monthly bours and earnings tend to show certain irregularities reflecting this method of reporting.

Source: Department of Labor, Bureau of Labor Statistics; data on Federal projects published currently in Construction Bulletin, private projects in Monthly Labor Review.

### No. 287 .- MONTHLY LABOR TURN-OVER RATES (PER 100 EMPLOYEES) IN MANU-FACTURING INDUSTRIES: 1939 TO 1946

[Month-to-month employment changes as indicated by labor turn-over rates are not precisely comparable to those in tables 217-219, as the former are based on data for entire month while the latter refer to a one-week period ending nearest middle of month. In addition, labor turn-over data, beginning in Jan. 1943, refer to all employees, whereas employment and pay-roll data relate only to production workers. The turn-over sample is not so extensive as that of the employment and pay-roll survey—proportionately fewer small plants are included; printing and publishing, and certain seasonal industries, such as canning and preserving, are not covered]

Source: Department of Labor, Bureau of Labor Statistics; May issues of Monthly Labor Review.

Number of workers involved in some work stoppages which occurred between 1916 and 1926 is not known. Missing information is for smaller disputes and totals here given are fairly accurate.

1 "Total employed workers" includes all workers except those in occupations and professions where strikes rarely if ever occur. In general, "total employed workers" includes all employees except following groups: Government workers, agricultural wage earners on farms employing less than 6 workers, managerial and supervisory employees, and certain groups which because of nature of work cannot or don strike (such as college professors, clergymen, and domestic servants). Self-employed and unemployed persons are excluded.

1 Obtained by multiplying average number of employed workers each year by number of days worked by most samployees during year.

No. 241.-Work Stoppages, by Industry Groups: 1941 to 1945

I Less than sum of figures below, because one or more strikes each affecting more than I industry, have been counted as separate strikes in each industry affected, with the proper altocation of workers and man-days idie to each industry.

\* Exceeds number employed in industry as several thousand coal miners were involved in move than I strike during year.

2 Included in other nonmanufacturing industries.

## 9. Military Services and Veterans' Affairs

This section includes data on the Army, the Navy, other branches of the military service and on the various aspects of government programs for veterans.

Military services.—Data are compiled from the various branches as indicated in the source notes. A summary table prepared by the Bureau of Labor Statistics, similar to their tables on employment in the section on Labor Force, is also included.

Veterans' Administration.—The Veterans' Administration was created under authorization of the act of Congress approved July 3, 1930 (46 Stat. 1016: 38 U. S. C. 11), to consolidate and coordinate under a single control all Federal agencies dealing with veterans' affairs.

The Veterans' Administration administers laws relating to the relief of, and other benefits provided by law for, former members of the military and naval forces. responsible for extending relief to veterans and to dependents of deceased veterans of all wars, and to veterans and to dependents of deceased veterans who served in the Government military and naval establishments during time of peace, as provided for by various acts of Congress. These benefits include, in addition to compensation, pensions, vocational rehabilitation, and education, the guarantee or insurance of loans for purchase or construction of homes, farms, and business property, readjustment allowance for unemployed or self-employed veterans, Government life insurance, death benefits, adjusted compensation, emergency and other officers' retirement pay, and physical examinations, hospital and out-patient treatment, and domiciliary care. The Veterans' Administration also administers the insurance section of the Soldiers' and Sailors' Civil Relief Act for persons in the active military service.

Philippine Scouts.

Philippine Scouts.

Tovers Navy, Marine Corps, and Coast Guard. Includes missing personnel and personnel in hands of enemy.

For war period, represents obligations for pay of Army personnel.

Covers Navy, Marine Corps, and Coast Guard. For Navy proper, includes cash payments for clothing allowances. For Navy proper and Marine Corps, includes pay rolls for retired and inactive personnel.

Includes men's share of family allowances but excludes Government's contribution.

Represents Government's contribution. Excludes men's share.

Represents Government's contribution. Excludes men's share.

Includes leave payments of \$716,313,000 (representing face value of bonds and cash payments) to former enlisted personnel for accrued and unused leave, and to present officers and enlisted personnel for leave accrued in excess of 60 days.

### No. 243.—ARMY OF THE UNITED STATES—STRENGTH OF COMPONENT PARTS: 1890 то 1941

For period prior to 1914, table covers quinquennial years and years of considerable changes in Regular Army. Figures for Reserve officers include data for Regular Army enlisted men, and also, for years prior to 1924, for National Guard officers holding commissions in Reserve. Hence, grand totals include a relatively small amount of duplication]

campaigns, etc.

Source: The American Red Cross; annual report, except as noted.

<sup>1</sup> Not available.
2 Based on population estimates of Bureau of Census.
3 Data for chapter budgets not included; additional expenditures by the 3,754 chapters estimated at approximately 267,000,000 for year ending Mar. 31, 1946. Activities common to all services, such as stenographic section, files, etc., previously prorated to the various services, are included with "other services" for 1946.
4 Includes expanditures for supervision, field service, correspondence, public relations, roll call and fund-raising

### No. 259.—VETERANS RECEIVING HOSPITAL OR DOMICILIARY CARE AUTHORIZED BY VETERANS' ADMINISTRATION: 1932 TO 1946

[During fiscal year 1946, 1,662,709 out-patient treatments were given and 2,826,530 out-patient examinations were made. On June 30, 1946, 4,660 veterans domiciled in State and Territorial homes were eligible for care in facilities controlled by Veterans' Administration. For each person, Federal Government reimbursed these homes at rate of \$120 per year through August 1839, \$240 per year through Dec. 17, 1943, and \$300 per year thereafter]

## 10. Social Security and Related Programs

(Data in this section relate to continental United States, Alaska, and Haw ali, except as noted)

Broadly considered, the term "social security" may encompass all public provisions for payments to individuals on an insurance or similar basis to compensate for part of the loss in earnings resulting from old age, sickness, disability, unemployment, or death; assistance, or payments on a needs basis, to persons with inadequate income; earnings on public work programs for such persons; insurance against the costs of medical and hospital care; and services rendered to individuals to improve their health earning power, and welfare. The aggregate expenditures for these purposes from Federal and State and local funds are shown in table 260; a comparison of these expenditures with total receipts and expenditures of Federal, State, and local governments may be made by reference to tables 342-344 and 384-388.

Social insurance and related programs (tables 260-264).—This category comprises a group of programs under which recurring or other payments are made on the basis of past earnings or service. The group includes (a) the two insurance programs established by the Social Security Act for industrial and commercial workers—Federal old-age and survivors insurance and Federal-State unemployment insurance; (b) the two similar programs administered by the Railroad Retirement Board for employees of railroads and certain of their affiliates; (c) retirement, disability, and survivor programs for veterans, other military personnel, and employees of Federal, State, and local governments; and (d) workmen's compensation.

Information on benefits and beneficiaries under these programs, by risk met, is shown in table 264. The Social Security Bulletin carries current data on all these programs for which monthly figures are available, and its supplement, the Social Security Yearbook, summarizes annual data for all. More detailed information for certain programs appears in this section in tables on old-age and survivors insurance, State unemployment insurance, railroad retirement, railroad unemployment insurance, and Federal, State, and local government employee retirement systems.

The extent to which wages and salaries in the United States are earned in employments covered under selected social insurance and related programs is shown in table 261. Coverage, eligibility, disqualifications, and levels of benefits differ for the various programs. Notes to the detailed tables indicate the major limitations to be considered in interpreting the data; source notes indicate the publications which should be consulted for more detailed data and analyses of the figures, and of administrative factors which may affect the data.

Public aid.—The Social Security Administration collects or compiles data from States on payments to needy persons from public funds. Beginning with 1936, this information has been issued in summary tables for the continental United States, including data furnished by other Federal agencies on subsistence payments to farmers, and on persons employed on Federal work programs and their earnings from such employment (table 265). The amounts shown as assistance exclude administrative costs and represent total payments to recipients from Federal, State, and local funds, including sums made available to the States as Federal grants under the Social Security Act for old-age assistance, aid to dependent children, and aid to the blind. The Social

Security Bulletin and Yearbook give these data also in terms of source of funds and operations under State public assistance plans approved under the Social Security Act as distinct from other similar programs in the United States.

Health and welfare services.—The Social Security Act of 1935 included grants to States for maternal and child health services, services for crippled children, child welfare services, vocational rehabilitation, and public health. The Children's Bureau—since July 16, 1946, a part of the Social Security Administration—administers the first three of the programs listed, with funds appropriated under that act. Separate legislation (Public Law No. 113, 78th Cong., approved July 6, 1943) has set up authorizations of funds for vocational rehabilitation (table 170) to be administered by the Office of Vocational Rehabilitation. The Public Health Service also now makes grants to States through a separate law (Public Law No. 410, 78th Cong., approved July 1, 1944). In tables 262 and 263 are shown the Federal funds granted for these health and welfare programs and for other purposes under the Social Security Act, as amended, and other Federal laws.

#### SOCIAL INSURANCE FOR INDUSTRIAL AND COMMERCIAL WORKERS

The social insurance programs established under the Social Security Act cover employment in industry and commerce, specifically excluding such types of service as agricultural labor, domestic service in private homes, employment by governmental agencies, by certain types of nonprofit organizations, and by railroads and certain of their affiliates; casual employment not in the course of the employer's business, employment by certain close relatives, and self-employment. Under the federally administered old-age and survivors insurance program, workers are insured against wage loss resulting from old age and death, and against unemployment under State unemployment insurance programs. In addition, the Rhode Island Unemployment Compensation Board administers cash benefits for workers covered by the State unemployment compensation law who suffer a wage loss because of temporary sickness. A similar program has been instituted in California, under which benefits became payable in December 1946.

Old-age and survivors insurance (tables 266-272).—This program provides monthly retirement benefits to fully insured workers at age 65 or over, supplemented by payments to their wives aged 65 or over and children under age 18. Survivor benefits comprise monthly payments to certain dependents of fully or currently insured workers—children under age 18, and widows if they have in their care a child beneficiary of the deceased insured worker. If the deceased worker was fully insured, survivor benefits are payable to his widow aged 65 or over or, if he leaves no widow or unmarried child under 18 immediately or potentially eligible for benefits, to parents aged 65 or over who were chiefly dependent on the insured worker. If no monthly benefits are payable for the month in which the insured worker dies, a lump sum is paid to the spouse who was living with the worker at the time of death. If the worker had no such spouse, the payment is made as reimbursement for burial expenses to a person or persons equitably entitled to such payment. Under the Social Security Act Amendments of 1946, guaranteed protection under the program is provided to survivors of World War II veterans who meet certain service requirements and die or have died within 3 years after their discharge, if pension or compensation is not payable by the Veterans Administration by reason of the veteran's death.

A worker is fully insured if, when he files his claim for retirement benefits, he has received at least \$50 in wages from covered employment in a minimum of 6 quarters and in 1 quarter of every 2 which have elapsed since the end of 1936—or since attainment of age 21 if later—and his attainment of age 65 or death, or if he has had at least 40 quarters of coverage. A worker is currently insured if he has had wages of \$50 or more from covered employment in at least 6 of the last 13 quarters, including the quarter in which he dies.

Monthly benefits—which have been payable since January 1940—and lump-sum payments are based on the worker's average wage as legally defined. The minimum payable on the basis of an insured worker's wage record is \$10 a month, and the maximum is the least of the following three amounts: \$85 a month, 80 percent of the legally defined average monthly wage of the insured worker, or twice the amount he would receive as a monthly retirement benefit on the basis of his wage credits. Benefits are suspended for any month in which the beneficiary, or the person on whose wage record benefits are based, earned more than \$14.99 in covered employment.

Workers in employments covered by the program and their employers each pay contributions on the worker's wages, not counting amounts above the first \$3,000 in a year. Since 1937, as a result of laws successively postponing scheduled increases, the rate has been 1 percent for workers and 1 percent for employers. An amount equal to the contributions collected is appropriated for deposit in the old-age and survivors insurance trust fund, from which benefits and administrative costs are paid. The wage credits of a worker—the amounts of his wages up to a maximum of \$3,000 a year—are recorded in individual employee accounts maintained by the Bureau of Old-Age and Survivors Insurance.

Unemployment insurance (tables 273-277).—In general, State unemployment insurance laws cover the same types of employment as old-age and survivors insurance. However, some States limit their coverage to workers in firms with a specified minimum number of workers in a specified number of weeks in a year (table 273).

State reports on employment and wages under their unemployment insurance systems (tables 273 and 274) include total pay rolls of subject employers. In all States but one the standard rate of contributions payable by employers is 2.7 percent of wages paid, not counting amounts above the first \$3,000 a year paid to an employee; in Michigan the standard rate is 3.0 percent. In a very few States, employees also contribute. All but six States adjusted employer contribution rates in 1946 in accordance with "experience rating" based, in general, on the extent to which their workers have drawn benefits. The Federal Government imposes a Federal unemployment tax on substantially all employers of 8 or more in industry or commerce; against this Federal tax employers credit, up to 90 percent of their Federal liability, contributions they have paid under State unemployment insurance laws or would have paid if they had been assessed at the standard rate.

Contributions collected by States are deposited to State accounts in the Federal unemployment trust fund, from which States withdraw amounts needed for unemployment benefit payments. (Under the 1946 amendments, States which have collected employee contributions may use that money to finance cash sickness benefits.) The Federal Government, through grants to States certified by the Commissioner of the Social Security Administration, meets the necessary administrative costs of State unemployment insurance systems which are found to conform, in law and administration, with statutory Federal requirements.

Benefits are paid only to unemployed covered workers who meet qualifying conditions of the State laws. In general a waiting period of 1 or 2 weeks must be served before payments begin. Benefits are payable for a maximum number of weeks, 20 in 22 States but ranging from 14 to 26 weeks among the others. Weekly benefit amounts represent about 50 percent of wages but may not exceed maximums ranging from \$15 to \$28 depending on the State law. Four States take account of the unemployed worker's dependents in determining the amount of benefits payable to him.

#### SOCIAL INSURANCE FOR RAILROAD WORKERS

The programs established under the Railroad Retirement Act and the Railroad Unemployment Insurance Act cover social insurance for employees of railroads (including the Railway Express Agency and the Pullman Company) subject to part I of the Interstate Commerce Act, affiliated companies such as refrigerator-car loan com-

panies which perform services in connection with railroad transportation, organizations such as railroad and traffic associations maintained by two or more covered employers, and standard railway-labor organizations which are national in scope. Both programs are administered by the Railroad Retirement Board, which publishes detailed data on operations in its Monthly Review and Annual Report.

Railroad retirement insurance (tables 283-288).—The Railroad Retirement Act, as passed in 1935 and amended in 1937, provides for five classes of retirement and survivor benefits: (1) Employee annuities, based on years of service (up to a maximum of 30 if service before 1937 is included) and on the average monthly compensation (exclusive of earnings over \$300 a month). Age annuities are payable at age 65 or, on a reduced basis, at age 60 after 30 years of service. Annuities for total and permanent disability are payable after 30 years of service or, if after less than 30 years, on a reduced basis at age 60. At present, the maximum annuity is \$120 a month. (2) Survivor annuities. paid to the spouse of a deceased annuitant who had elected to take a reduction in his own benefit. (3) Death-benefit annuities, paid under the 1935 Act, and for a 12month period only, to the spouse or dependent next of kin of a deceased annuitant, (4) Lump-sum death benefits, paid under the 1937 Act to the designated beneficiary or to surviving relatives in a prescribed order of precedence. The benefit is roughly equal to a return of contributions less retirement benefits received. (5) Pensions, paid under the 1937 Act to individuals who were on the carrier pension rolls on July 1, 1937, and who were not eligible for annuities on that date.

The funds of the retirement system come from a tax on compensation (exclusive of earnings over \$300 a month). The total tax rate, divided equally between employer and employee, started at 5½ percent in 1937, and is scheduled to rise by ½ percent at 3-year intervals until 7½ percent is reached in 1949. Appropriations for benefit payments and administration and for establishing a reserve under the Railroad Retirement Act are made by Congress annually on the basis of anticipated tax collections.

Railroad unemployment insurance (tables 289 and 290).—The Railroad Unemployment Insurance Act was passed in 1938 and amended in 1939 and 1940. It became effective on July 1, 1939. Benefits are payable during a benefit year to unemployed workers who earned at least \$150 in compensation with a covered employer in the base year, which is the calendar year preceding the beginning of the benefit year. A benefit year begins on July 1 and ends on June 30 of the following year. Benefits are payable for each day of unemployment in excess of 7 in the first 14-day registration period and for each day in excess of 4 in subsequent registration periods, up to a maximum of 100 days in the benefit year.

The railroad unemployment insurance program is financed entirely by contributions paid directly to the Railroad Retirement Board by covered employers, amounting to 3 percent of pay rolls (exclusive of individual earnings in excess of \$300 a month).

The Railroad Unemployment Insurance Act also provides that the Board may operate an employment service for the railroad industry.

#### RETIREMENT SYSTEMS FOR GOVERNMENT EMPLOYEES

Federal systems.—Three contributory retirement systems for Federal civilian employees and one noncontributory system are administered by the Civil Service Commission. In addition, there are other systems for Federal employees not otherwise covered (table 297).

The Civil Service Retirement Act, as passed in 1920 and amended subsequently, provides old-age and disability annuities for employees in the executive, judicial, and legislative branches of the United States Government and for those employees in the municipal government of the District of Columbia not subject to the special retirement systems for teachers, firemen, and policemen. Approximately 2,069,000 employees were subject to this Act as of June 30, 1946. Under the 1942 amendments, retirement is compulsory at age 70 for employees with at least 15 years of service.

Optional retirement at ages 60-61 for employees with at least 30 years of service and at ages 62-69 for employees with at least 15 years of service may be exercised by either the employee or the head of the department. For any given period of service, the benefits are weighted in favor of employees with lower salaries. For a description of other types of payments see the footnotes to table 294. The employee contribution rate, computed on base pay, has been 5 percent since July 1942. The rate had been 3½ percent for July 1926-June 1942 and 2½ percent for August 1920-June 1926.

The Panama Canal Zone Retirement Act, passed in 1931, pertains to employees of the Panama Canal and the Panama Railroad Company who work in the Isthmus of Panama and are citizens of the United States. About 5,250 employees were covered by this act in June 1946. Employee contributions are 5 percent. Employees of the Alaska Railroad in Alaska who are citizens of the United States come under the Alaska Railroad Retirement Act, enacted in 1936. The coverage under this system was about 1,780 persons in June 1946. The contribution rate is 5 percent. Both acts contain more liberal retirement provisions than the Civil Service Retirement Act for the lower-salaried employees.

These three acts cover about 90 percent of Federal civilian personnel, including elected and appointed officials. They do not require specific payments from the Government as employer, but each implies that the Government will furnish the amounts necessary to finance its retirement and disability fund and to continue the act in full force and effect. Appropriations have been made annually by the Congress to each fund after a short period of operation.

A special act was passed in 1944 to provide noncontributory annuities for citizens of the United States employed during the Panama Canal construction period and not receiving benefits under other Federal retirement acts.

Separate retirement systems, some contributory and others noncontributory, are in operation for the armed forces and special classes of Federal employees.

State and local systems.—The 1,800 retirement systems administered by States and by local governmental units covered approximately 55 percent of the 3.1 million employees of State and local governments in January 1945. Proportionately more school employees—an estimated 72 percent—than nonschool employees—44 percent—were members of systems.

The benefits provided by the State and local retirement systems, and the conditions which govern eligibility for benefits, vary widely among the various systems. Many of the plans have been set up on an occupational basis, and consequently the variations are to a large extent associated with the type of employee covered. Thus, systems for members of the judiciary commonly set the retirement age at 70, while those covering persons engaged in physically arduous or hazardous jobs may permit retirement as early as age 55. Most systems have relatively stringent eligibility requirements of age and years of service. The retirement benefit is usually heavily weighted by years of service, and no benefit—other than a refund of contributions with, perhaps, interest—is payable to the employee who spends only a few years in employment covered by the system.

For most State and local government employees, survivor protection is afforded only for survivors of annuitants who have elected a reduced benefit or consists of only a refund of contributions. Plans covering policemen and firemen, on the other hand, generally recognize the need to provide monthly benefits for survivors of employees who die in service.

Definitions of compensable disability range from the rigid requirement of complete and permanent disability of service-connected origin to fairly liberal provisions for non-service-connected disability and "inability to perform useful and efficient service." For some groups of State and local government employees, service-connected disability is compensated solely through workmen's compensation programs. For other groups, a choice between the two programs is permitted, or the retirement system

pays a benefit which may be reduced by the amount of workmen's compensation. In systems which provide benefits for non-service-connected disability, eligibility usually depends on a specified period of service, which may be as short as five years but which in an occasional system is long enough to resemble a requirement for service retirement.

Contributions of members of retirement systems in 1940-41 averaged a little more than 4 percent of salary; this proportion varied, of course, from system to system and from member to member—depending in part on the type of protection they were buying and the age at which they started to purchase it. The average contribution of the governmental units to these systems was between 5 and 6 percent of the payroll for covered employees.

#### PUBLIC ASSISTANCE

#### (Tables 292 and 293)

Under the Social Security Act, the Federal Government shares with the States the costs of administration and money payments for special types of public assistance (aid to needy persons aged 65 and over, needy blind, and dependent children under age 16—or 18 if regularly attending school—who have been deprived of parental support or care for specified reasons). To receive a Federal grant under any one of these programs, a State must have a plan approved as meeting the requirements of the Social Security Act. Each State establishes the conditions under which needy people may receive assistance under its programs and determines how much they shall get.

Under the 1939 amendments the basis for Federal matching was one-half the amount (up to \$40 a month) given by the State to a needy aged or blind person, and, for aid to dependent children, one-half the amount given by the State up to \$18 a month for the first child and \$12 for each additional child aided in the same home. In addition, the Federal Government paid half the administrative costs of approved State programs for aid to the blind and aid to dependent children and increased its grants to States for old-age assistance by 5 percent as a contribution toward such costs. The maximum payment matchable from Federal funds was increased by the Social Security Act Amendments of 1946, effective for October 1946 and continuing through 1947, to \$45 for old-age assistance and aid to the blind and to \$24 for the first child and \$15 for each additional child under aid to dependent children. The Federal Government pays two-thirds of the first \$15 of the average monthly assistance payment for aged and blind recipients and of the first \$9 of such average payment for dependent children, plus one-half of the remainder of matchable expenditures. For all three programs, the Federal share of the cost of State administration is one-half the sums expended.

Payments to recipients under all these programs do not necessarily represent the sole resources of the persons receiving payments; in making payments, States take account of the resources as well as the requirements of recipients and may use general assistance to supplement inadequate payments under the three special types of assistance. Some States limit payments to amounts lower than the maximums for Federal participation; other States make payments above these maximums.

One State administers a plan for aid to dependent children, and three administer plans for aid to the blind, without Federal funds. In all States, general assistance is administered without Federal financial participation.

#### No. 260 .- Public Expenditures for Social Security and Related Purposes, BY SOURCE OF FUNDS: FISCAL YEARS 1944 AND 1945

millions. Represents expenditures from general, special, and trust accounts; excludes transfers to such accounts and loans. Includes administrative expenditures unless otherwise indicated. Fiscal years of Federal Government, most States, and some localities ended June 30; fiscal years of other States and localities cover various 12-month periods ended within year] (In millions.

: See table 297 for data relating to systems covering Federal employees other than systems administered by Civil Service Commission.

Civil Service Commission.

2 Old-age retirement benefits under all acts, disability retirement benefits under Railroad Retirement and Civil Service Retirement Acts, and disability payments to veterans.

1 Number of primary and supplementary (wife's and child's) benefits in current-payment status, and amounts certified. Partly estimated.

4 Age and disability annuitants and pensioners. Payments represent amounts certified, minus cancellations.

2 Includes survivor benefits under joint and survivor elections; not adjusted for suspension of annuities of persons reemployed under National Defense Acts of June 28, 1940, and Jan. 24, 1942.

4 Widow's, widow's current, parent's, and child's benefits in current-payment status and amounts certified.

Partly estimated

Number of widows, parents, and children of deceased veterans, and amount of payments.
 Number of decedents on whose account lump-sum payments were certified, and amount of payments.

Payments for burial of deceased veterans.

- A vergage weekly number. Amounts adjusted for voided benefit checks.

  "Under Servicemen's Readjustment Act, effective September 1944. Beneficiaries of unemployment allowances represent average weekly number; of self-employment allowances, number during month.
- Average number of persons receiving benefits for unemployment in a 14-day registration period. Amounts adjusted for underpayments and recoveries of overpayments.
   Beneficiaries as of June. Payments include lump-sum survivor benefits and refunds. Data estimated; for
- 1945, preliminary.

  4 Not available.
- Not available.
  Data represent payments to individuals and exclude cost of administration. Payments under Social Security and B. B. Retirement Acts (including retroactive payments) and payments under R. R. Unemployment Insurance Act are amounts certified; payments under Civil Service Commission and Veterans' Administration are disbursements minus cancellations; R. I. sickness compensation and State unemployment insurance payments are adjusted for voided benefit checks.

Data estimated; for 1945, preliminary.

<sup>1</sup> For 1833-35 data see Statistical Abstract, 1944-45, table 205, p. 196.
<sup>1</sup> Represents recipients of payments from Federal, State, and local funds for programs administered under State parameters with the state and from State and Aministered under State laws without Federal participation, and amount of stude payments. Excludes cost of hospitalization and burial and, beginning September 1940, recipients and cost of medical are.
<sup>1</sup> Excludes cost of hospitalization and burial and, beginning September 1940, recipients and cost of medical care.
<sup>1</sup> Excludes cost of hospitalization and burial and, beginning September 1940, recipients and cost of medical care.
<sup>1</sup> Lass receiving relief under emergency education, student aid, rural rehabilitation, and translent programs of emergency relief administration, largely financed from FERA funds, and amount of such relief.

Net number and net amount of emergency grant vouchers certified to cases and cases receiving only commodities purchased by FSA and distributed during period and value of such commodities. Dropped from series after June 1942 because appropriation was drastically reduced and payments limited to need occasioned by natural disasters. Data from FSA.

Excludes administrative employees and their earnings.

Excludes persons only, represents averages computed from reports on number of persons enrolled on 10th, 20th, and last day of the month, except for Indian Division, for which averages were computed from daily reports. Earnings estimated by multiplying average monthly number enrolled by average of \$70 through June 1639, \$67 for

July-October 1939, \$66.25 for November 1939-June 1941, and \$67.20 subsequently for enrolleds other than Indiana, and \$60.30 for Indiana. Average amount based on obligations only described than Indiana, and \$60.30 for Indiana. Average amount based on obligations and incurred for cash allowances, cibring, sheller, subsistence, and medical care for persons employed during month, except for out-of-chool program after June 1941, which represents average of weekly employment counts. Data until July 1938 from WPA, subsequently, from NYA.

A verage weekly number of persons employed on projects operated by WPA, and clury partolled supplyment on Federal agency projects financed in whole or in part from emergency Federal funds other than those on projects financed in whole or in part from emergency Federal funds other than those on projects financed in whole or in part from emergency Federal funds other than those of CWA, CCC, NYA, and WPA; earnings overing all pay-roll periods ended during year. Beginning October 1941, employment and earnings on projects financed from EPWA funds only; figures not available for other Federal agency projects financed moder Femergency Relief Appropriation acts. Data from Bursau of Labor Statistics.

<sup>&</sup>lt;sup>1</sup> Includes \$19,000 certified in lump-sum payments under 1935 act; distribution by State not available. See footnote 3, table 267.

Includes retroactive payments. Distribution by type estimated. Supplementary benefits are paid to entitled vives and children of retired (primary) beneficiaries. Survivor benefits are paid to the following survivors of deceased insured workers: aged widows, children, and younger widows with child beneficiaries in their care—or to dependent aged parents.
 Payments under 1939 amendments. See footnote 2, table 267.

No. 272.—Old-Age and Survivors Insurance—Sample (1 Percent) of Workers With Wage Credits at Some Time in 1937-44, by Cumulative Wage Credits IN 1937-44, INSURANCE STATUS JAN. 1, 1945, AND AGE GROUP

[1-percent sample of all workers with wage credits identified for posting by July 31, 1945; only partly adjusted for duplication of workers with more than 1 account. Includes workers who died during the period 1937-44 and workers who became entitled to primary insurance benefits before Jan. 1, 1945. Age represents age at birthday in 1944. Figures marked with an asterisk (\*) represent data for less than 100 workers and may be unreliable because of the large probable sampling error. Corrected to Aug. 1, 1946]

<sup>1</sup> A worker who is fully insured as of a given date (in this table, Jan. 1, 1945) is one who has had at least 6 calendar quarters of coverage and not less than 1 such quarter for each 2 calendar quarters elapsed after 1936 or after the quarter in which be attained age 21, whichever is later, and up to but excluding the quarter in which be died, attained age 65, or the given date, whichever first occurred. A worker who is currently insured as of a given date is one who has had 6 quarters of coverage in the 12 quarters immediately preceding that date or the quarter in which be died. Uninsured workers are those who have some wage credits but are neither fully nor currently insured as of the given date. A quarter of coverage is a calendar quarter in which the worker has been paid not less than 850 in taxable wages. \$50 in taxable wages.

Total includes 6,641 of unknown age not shown separately, of whom 283 were fully insured, 183 currently insured only, and 6,175 uninsured.
 Inapplicable under provisions of the Social Security Act.

<sup>1</sup> Sum of balances in State clearing account and benefit-payment account, and in State unemployment trust fund account in U. S. Treasury. State unemployment trust fund accounts include interest credited.

2 Contributions, penalties, and interest from employers and contributions from employees. Adjusted for refunds of contributions and for dishonored contribution checks. Current contribution rates (percent of taxable wages) are: For employers, 2.7 percent except in Michigan, where rate was 3.0 percent; for employees, 1.0 percent in Alabamas, California, and New Jersey, and 0.5 percent in Rhode Island. Experience rating, operative in 42 states in 1944 and in 45 States in 1945, modifies above rates.

1 Adjusted for voided benefit checks.

<sup>1</sup> Excludes railroads and allied groups subject, as of July 1, 1939, to Railroad Unemployment Insurance Act.

2 Until January 1945, represents covered employment on last pay roll of each type (weekly, semimonthly, etc.) ended in the month; thereafter, employment on pay roll of each type ended nearest the fifteenth of the month. Annual figures represent averages of 12 monthly figures.

3 Total wages in covered employment for all pay periods ended within the period.

4 Annual figures represent first payments to beneficiaries; monthly figures represent average weekly number of weeks of unemployment compensated during the month.

5 For 1938-39, represent number of benefit payments.

4 Annual amounts adjusted, but monthly figures not adjusted, for voided benefit checks.

7 Data not available.

5 Excludes: California, Maine, and Oregon for January: Massachusetts and Virginia for January-March. Inc.

Source: Federal Security Agency, Social Security Administration, Bureau of Employment Security; Social Security Yearbook, 1945; some of these data appear periodically in Social Security Bulletin.

No. 284.—RAILROAD RETIREMENT—ANNUITIES AND PENSIONS BY CLASS—NUMBER OF PAYMENTS INITIALLY CERTIFIED, TERMINATED BY DEATH, AND IN FORCE: 1938 TO 1946

Figures for initial certifications are for period during which payment first certified and not for period during which annuity began to accrue. Figures for terminations by death are for period during which notice of death received and not for period during which beneficiary died. Cumulative figures exclude claims declared ineligible, erroneous certifications, and erroneous reports of death. In force figures as of any date include only certifications made up to that date, less terminations by death reported by that date; they are also adjusted for recertifications, reinstatements, and terminations other than by death (suspension, return to service, recovery from disability, and commutation to lump-sum payment) items which are not shown in this table]

CLASS	1938	1939	1940	1941	1942	1943	1944	1945	1946

# No. 287.—Railboad Retirement—Number of Employees, by Amount of Credited Compensation: 1944

[Includes employees covered under Railroad Retirement and Railroad Unemployment Insurance Acts for whom wages were reported by subject employers. Some of these employees also had wages taxable under Federal Insurance Contributions Act and are therefore included in preceding tables on old-age and survivors insurance. Earnings in this table include wages and salaries, commissions, back pay, and payments for time lost as an employee, reported by subject employers; however, excess over \$300 in any 1 calendar month for an employee is excluded]

Source: Railroad Retirement Board. Data are published currently in The Monthly Review.

<sup>1</sup> Application for certificate of benefit rights is submitted when unemployed worker applies for unemployment insurance benefits for first time with respect to benefit year. Certificate of benefit rights is issued to each amployee who has filed application for such certificate and who has had sufficient earnings from a railroad employer in base year to qualify for unemployment insurance benefits. Data apply to unemployment in current year in 1939-40, 1940-41, and 1941-42, and unemployment in current or prior year beginning with 1942-43.

3 A claim is prepared for each period beginning with a day of unemployment. Period prior to November 1, 1940, comprised 15 consecutive days, and 14 consecutive days after November 1, 1940. Claim contains registrations for each day of unemployment in period and is submitted at end of period. Claims are received even where there are insufficient days of unemployment for payment of benefits.

3 Adjusted for payment of underpayments, recovery of overpayments and erroneous payments. On claims applying to 15-day periods begun prior to November 1, 1940, benefit payments were certified for qualified claimants who had served their waiting period if claimant registered for at least 8 days of unemployment; amount of certification is product of daily benefit amount and number of days of unemployment in excess of 7. On claims sapplying to 15-day periods begun on or after November 1, 1940, benefit payment is certified for qualified claimants who had served their waiting period if claimant registered for at least 5 days of unemployment, amount certified being product of daily benefit amount and number of days of unemployment in excess of 4. In addition, benefits are certified on waiting-period claims, if number of days of unemployment in such period is 8 or more; on such claims benefit is calculated as product of daily benefit amount and number of days of unemployment in such period is 6 or more; on such claims benefit is calculated as product of days for which benefits may be paid were also i

<sup>4</sup> An account is opened with first benefit payment in benefit year. A benefit account was exhausted, prior to November 1, 1940, upon payment of benefits for 80 compensable days of unemployment, since then, for 100 compensable days of unemployment. Data cover all operations for year, regardless of time at which unemployment occurred. Data for 1940-41 adjusted for comparability to include all beneficiaries receiving benefits for unemployment in current year by June 30.

employers.

1 Includes unknown number of clearances, under War Manpower Commission regulations, of workers who

Includes unknown number of clearances, under war manpower Commission regulations, of workers who applied for jobs at employer offices.
 Not available.
 Partly estimated.
 Clearance of workers through a public employment service ceased when manpower controls were lifted immediately after surrender of Japan.
 Recruitment of these casual workers was discontinued during latter part of September 1945.

<sup>1</sup> Partly estimated; total not as large as sum of State figures because of adjustment for 2 States. See footnote 5, 2 Excludes some cases and local funds not administered by State agency.

<sup>&</sup>lt;sup>2</sup> Estimated.

Excludes assistance in kind and cases receiving assistance in kind only and, for a few counties, cash payments and cases receiving cash payments. Amount of payments shown represents approximately 60 percent of total.
Includes unknown number of cases receiving medical care, hospitalization, and burial only, and total payments

Represents 3,524 cases aided by county commissioners, and 2,071 cases aided under program administered by State Board of Public Welfare; amount of duplication believed to be large.

Data appear

<sup>1</sup> Through June 30, 1940, data relate entirely to employees retired voluntarily or involuntarily under various age and length of service requirements and to employees with at least 5 years of service who became totally disabled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, employees may elect a joint and survivor annuity; number of survivor annuities in force as of June 30 increased from 26 in 1941 to 278 in 1946. Beginning Jan. 24, 1942, employees with at least 5 years service who separate voluntarily or involuntarily prior to eligibility for retirement may obtain deferred annuity at age 62; such annuitants increased from 5 as of June 30, 1942, to 4,825 as of June 30, 1940.

3 Through Jan. 23, 1942, data relate to refunds of amounts to employees' credit in fund paid to employees not eligible for an annuity or, if eligible, elected to take a refund. Beginning Jan. 24, 1942, data relate to refunds for service prior to Jan. 24, 1942, for employees separated on or after that date with less than 5 years service and refunds to employees separated on or after that date with less than 5 years service.

3 Data relate to refunds of amounts to employees' credit paid to designated or other beneficiaries of employees who died while in service or after separation.

4 Beginning Sept. 1, 1934, data relate primarily to refunds of balance of amount to annuitants' credit at time of death paid to designated or other beneficiaries of annuitants. Includes refunds to disability annuitants whose entitlement to an annuity was terminated.

entitlement to an annuity was terminated.

Beginning in fiscal year 1941-42, retirement payments to officers, warrant officers, enlisted men, and nurses residing in Philippine, Hawaiian, Panama Canal, or Antilles Department made by designated disbursing officer of those departments; data on number and amount of such payments not available.

Includes life-saving service.

Excludes system for civilian instructors of Naval Academy.

Data adjusted from figures for fiscal years ended February 28.

Less than \$600.
 Data adjusted from figures for calendar years.
 Number of deceased active and retired members, and amount of payments.
 Return of members' contributions with interest on separation from employment.

<sup>1</sup> Excludes refunds to members withdrawing from systems. Inclusion of lump-sum or nonrecurring payments makes annual benefit payments more than 12 times monthly benefit payments from which lump-sum payments are excluded. Moreover, annual benefits reflect additions to and withdrawals from old systems as well as creation of new systems, during year.

§ Includes 27 school districts and 6 special-purpose districts.

### 11. Income and Expenditures

[Data in this section relate to continental United States]

No. 802.—National Income by Distributive Shares: 1929 to 1946

[National income measures the earnings of the labor and capital employed in the productive process. It includes economic activities carried on by all producing entities—corporations, partnerships, individual enterprises, and governmental agencies. It is obtained by summating all wages, salaries, net dividends, net rents, net interest, net income of proprietors, and corporate savings. Corporate savings (positive and negative) represent net profits after deduction of cash dividends and taxes]

#### [Millions of dollars]

Source: Department of Commerce, Bureau of Foreign and Domestic Commerce; 1929-1941, Survey of Current Business, April 1944; 1942 and 1943, not published elsewhere. 1 Includes work-relief wages shown separately in table 302; excludes subsistence to members of armed forces.

#### No. 304.—Income Payments to Individuals, by States: 1929 to 1945

Income payments to individuals comprise (1) wages and salaries after deduction of employees' contributions to social insurance funds; (2) proprietors' incomes, representing net income of unincorporated establishments, including farms, before owners' withdrawals; (3) property income, including dividands, intarest, and net rents and royalties; and (4) "other" income payments, which include direct relief, labor income items such as work relief, pensions, compensation for injuries, and social insurance benefits; mustering-out payments to veterans; and family-allowance payments and voluntary allotments to dependents of military personnel. Income payments are distributed among States on a where-received basis (with exceptions noted below); only payments made to residents of continental U. S. included. Income payments differ from national income (tables 302 and 303) by inclusion only in income payments of items—termed "transfer payments"—which do not represent returns for labor or capital services rendered currently and by inclusion only in national income of certain items which are not actual payments to individuals. Income payments not included in national income are direct relief, veterans' pensions, adjusted service benefits (Soldiers' Bonus), retirement payments by government, social insurance benefits, Government's contribution to allowances paid to dependents of enlisted military personnel, and mustering-out payments. Items covered in national income but not in income payments include retained earnings of corporations and contributions by both employees and employers under social insurance legislation. Additionally, national income includes pay of Federal military and civilian personnel stationed outside continental U. S., whereas State income series excludes such pay with exception of that part flowing into this country in form of voluntary allotments to individuals and contributions to family-allowance payments to dependents of military personnel. Per capita income payments are derived by division of total in

#### No. 305.—Gross National Product or Expenditure: 1939 to 1946

[Gress national product represents total value of currently produced goods and services flowing to Government, to consumers, and for purposes of gross capital formation to business. Differs from national income by including business taxes, charges to depreciation, and certain other business reserves. These are elements of value of total production, but do not constitute income accruing to individuals

(In billions of dollars)

# No. 808.—Distribution of American Families and Single Consumers in Urban and Rural Areas, by Money Income: 1941

iFigures relate to all civilian consumers except inmates of institutions. Families are defined as economic units of two or more persons contributing to or mainly dependent on a common or pooled income. Single consumers are persons who live alone or as lodgers or servants in private homes, rooming houses, or hotels]

#### No. 809 .- Distribution of Families and Single Consumers by Money Income LEVEL: 1942

[Covers all civilian consumers except those living in institutions. Families defined as economic units of two or more persons sharing common or pooled income and living under common roof. Single consumers defined as men or women maintaining independent living quarters or living as lodgers or servants in private homes, rooming houses, or hotels. Term spending unit used to cover both groups. Civilian money income includes net money income of all civilians except those living in institutions; excludes all imputed (nonmoney) items, and all income paid to members of armed forces. Estimates on calendar year basis]

<sup>&</sup>lt;sup>1</sup> Estimated population used for all spending units was 129,100,000, of which 121,250,000 were in family unit<sup>8</sup>

Source: Office of Price Administration; Civilian Spending and Saving 1941 and 1942.

Estimated population used for all spending units was 129,100,000, of whiten 121,200,000 were in laminy units and 7,880,000 were single consumers.
 Includes only individual income taxes, poil taxes, and certain minor personal property taxes. Sakes taxes, excise taxes, and all indirect taxes on consumption are included under expenditures for goods and services.
 Savings defined as net change in assets and liabilities of spending unit during year, exclusive of gains or losses from revaluation of assets.
 Money contributions to church, Red Cross, and other institutions and funds.
 Money expenditures only.

No. 311.—Wage or Salary Workers (Except on Public Emergency Work) in March 1940, by Wage or Salary Income and Receipt of Other Income in 1939, BY COLOR AND SEX

[Wage or salary income includes all money received in 1939 in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, etc., as well as receipts commonly referred to as wages or salaries. Excludes value of income in kind, such as living quarters, meals, clothing, etc. Persons were classified as with or without other income on basis of answers to inquiry as to whether \$50 or more of insome was received from sources other than money wages or salaries in 1939. Includes persons employed as wage or salary workers (except on public emergency work) during census week, and persons seeking work last employed as wage or salary workers. Statistics based on sample B, see p. 1. Percent not shown where less than 0.1]

# No. 314.—Families by Family Wage or Salary Income and Receipt of Other Income in 1939, by Urban and Rural Areas

[Based on Sample F, see p. 1. For definitions of wage or salary income and other income, see table 311. Family wage or salary income obtained by combining wages and salaries reported by all persons 14 years old and over in family. Families were classified as "without other income" if all members 14 years old and over reported no other income)

### 12. Prices

The indexes issued by the Bureau of Labor Statistics have been, since the beginning of the century, the major source of price statistics in summarized form. This agency prepares a comprehensive weekly and monthly index of wholesale prices, a daily index based on spot market prices of 28 commodities; indexes of the cost of food at retail in 56 large cities; and indexes of consumers' prices for moderate-income families in 34 large cities.

The wholesale-price index is based on primary market quotations of about 850 commodities. In computing the index the price of each article is weighted by the quantity marketed during a representative period. Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one of the classifications are included under each classification. For example, articles produced on the farm which reach the consumer practically unchanged in form, such as potatoes, milk, and eggs, are included among both farm products and foods. However, in computing the index for all commodities such articles are counted only once.

The consumers' price index measures average changes in retail prices of selected goods, rent, and services, weighted by quantities bought in 1934-36 by families of wage earners and moderate-income workers in large cities. Indexes for the major groups other than food have been compiled from price data collected in 34 cities since September 15, 1940; and in a smaller number of cities in earlier years. Since March 1943, food indexes have been based upon changes in food prices in 56 cities. The list of items priced for the indexes includes approximately 180 goods and services. For many goods a number of different grades and qualities are priced so that over 320 different articles or qualities of articles are included in the index. Sales taxes are reflected wherever applicable, but income taxes, social security deductions, and bond deductions are not included.

From 1913 to 1925, the weights used are based on a study of the family expenditures in 1917-19 of this group of wage earners and workers. From 1925 to 1935, the weights of the individual goods and services priced are based on the 1917-19 study, and the group indexes are based on the estimated distribution of family expenditures in the same period. From 1935, the weights are based on a study of family expenditures in 1934-36. The items priced since 1935 represent about 70 percent of the expenditures of families whose incomes averaged \$1,524.

The consumers' price index is adjusted as necessary to take account of the changes in the availability of goods and services to moderate-income city families. During the war, adjustments were made in the weights for the food price index to reflect the wartime food shortages and rationing, and as consumer durable goods disappeared from retail stores, they were taken out of the index without allowing the index to decline on that account. The index did not, however, measure the full effect of the war changes in the quality and the availability of consumer goods, the under reporting of over-ceiling prices, and the disappearance of special sales. The President's Committee on the Cost of Living estimated in November 1944 that if these factors and others had been fully reflected in the index a maximum of three to four points would have been added to the rise in consumers' prices between January 1941 and September 1944. If small cities had been included in the national average, another one-half point would have been added. In December 1945, the Stabilization Director, in connection with Executive Orders 9599 and 9651, indicated that if account were taken of continued deterioration of quality and unavailability of merchandise between September 1944 and September 1945, the over-all allowance for the period from January 1941 to September 1945 would have totaled approximately five points for large and small cities combined.

The retail-food-cost indexes presented in this section for periods from January 1935 to March 1943 are based on the distribution of expenditures as shown by the 1934-36 study of expenditures of wage earners' and lower-salaried workers' families. In March 1943, the weights for this index were again revised to take account of changes in food purchases due to wartime shortages and rationing. In January 1946, these wartime weight adjustments were eliminated and certain other revisions made in the calculating procedures. The indexes are computed from prices of 54 foods for the period from January 1935 to March 1943, and from 61 thereafter. Aggregate costs of these foods in each of 56 cities (51 cities prior to March 1943), weighted to represent total purchases, have been combined for the United States with the use of population weights. Indexes for all periods prior to January 1935 are converted from indexes computed for corresponding periods on the 1923-25 base.

The Bureau of Agricultural Economics prepares currently indexes of prices received for farm products and of prices paid by farmers. (In addition to table 317 in this section, see tables 690 and 691.) The index of prices received for farm products included in this section is a revised series replacing the earlier series which has been in use for the past decade. Data cover prices paid to producers for 45 major farm products. Quantity weights applied to the individual commodities have been adjusted to marketings of the most recent prewar years, 1935–39. For other significant changes in the revised index, see source.

In comparing the movement of the indexes of consumers' prices and of the prices paid by farmers for commodities bought for family living (table 691), it should be noted that the consumers' price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differs because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

A number of privately compiled indexes of wholesale and retail prices provide some groupings not found in the official indexes. For example, the National Industrial Conference Board prepared current indexes for both a prewar and a wartime budget. Special purpose indexes have not been included in this section.

The user of price indexes is reminded that the margin of error in price statistics due to unrecorded changes in quality, in discounts, and in undercover charges is greater in war than in peacetime.

### No. 820.—Prices, Wholesale—Indexes, All Commodities and by Economic Classes: 1930 to 1946

[Figures in column heads indicate current number of quotations. Indexes of National Bureau of Economic Research are weighted arithmetic means for 680 price series, weights being based upon average value of production in 1927 and 1931. For method of computing Department of Labor publications in which data appear, see source note, table 319]

## No. 321.—Indexes of Spot Market Prices of 28 Commodities and of Waste and Scrap Materials: 1939 to 1946

[August 1939=100. Daily index of 28 commodities is available since August 1939; represents unweighted geometric average of daily price quotations. Commodities used in index are quoted on organized exchanges, bence index is much more sensitive to changes in market conditions than is monthly wholesale price index. Index numbers of waste and scrap materials, calculated weekly, available since January 1939; represent unweighted geometric averages of weekly price quotations. Quotations for 44 commodities in waste and scrap index are those published in standard trade journals]

Source: Department of Labor, Bureau of Labor Statistics; annual report, Wholesale Prices. Index of 28 commodities also published weekly in mimeographed reports.

Perishable and semidurable.

<sup>8</sup> Sum of number of quotations for preducers' and consumers' goods and for durable and nondurable goods is greater than number of all commodities owing to duplication of certain price series in classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.

#### No. 322.—Prices, Wholesale, of Important Commodities: 1929 to 1945

[List is selection from among commodities entering into general index of wholesale prices of Department of Labor as of December 1945 (see second paragraph, general note, p. 283). For weights of bushel and barrel, except as noted, see Appendix, p. 970]

#### No. 326.—Consumers' Price Indexes in 60 Cities: 1939 to 1945

[January 1939-100. Data cover prices of important commodities and services entering into family living expense, i. e., food, housing, clothing, fuel, light, housefurnishings, medical fees, automobile purchase and operation, carfare, etc. Wartime indexes included in 1944-45 Statistical Abstract discontinued because variation over period of 3 years (1942-44) insufficient to warrant maintenance of 2 series]

No. 829.—PRICES, AVERAGE RETAIL, OF PRINCIPAL ARTICLES OF FOOD: 1918 TO 1946

[Prices in cents per pound except for milk (cents per quart), eggs and oranges (cents per desen), and tematece (cents per No. 2 can). Data are averages of prices as reported by retail dealers in 51 large cities prior to 1943 and in 56 cities thereafter. Prices for individual cities combined with use of population weights]

1 Includes butter oil and butter spreads.

• Crude and refined prior to 1922 was 9.7.

• Sravised to exclude linters beginning 1915.

• Includes mineral spirits not reported separately since 1940.

Values required by law to represent values in foreign markets whence exported to United States. "Ton" agailies iong ton of 2,240 pounds. Averages obtained by dividing total value of imports of specified article by total quantity. Where, as in some commodities considerable price variations may exist between different grades, methods of packing, etc., and proportions of grades, etc., may vary from year to year, such averages may show actual price movements only roughly] No. 831.—Unit Values, Annual Average, of Important Articles Imported: 1915 to 1945

<sup>1</sup> Revised to exclude cabinet woods beginning 1919. Includes clapboards beginning \*8hort tons. July 1938.

3 Unrefined copper beginning 1916. 3 Beginning 1935, tons of 2,000 pounds, air-dry weight.

Source: Department of Commerce, Bureau of Foreign and Domestic Commerce through April 1941; Bureau of Census, thereafter; basic data published in annual report, Foreign Commerce and Navigation of the United States.

## 13. Elections

The conduct of elections in the United States for Federal, State, and local offices and on State and local issues, is regulated by State laws or, in some cities and a few counties, by local charters. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. Almost all of the more than 155 thousand governmental units in the United States conduct elections at various intervals—annual. biennial, quadrennial or longer—for different types of offices and other purposes. regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for the multitude of candidates, except for Federal offices, and in most States, for State offices. Few States require central reporting on local elections. The numbers of governments holding elections and the numbers of voters participating vary between Presidential and the intervening Congressional election years, and between even-numbered and odd-numbered years.

The tables in this section give summary data, by State, on elections to Federal offices, and indicate the principal State offices filled by popular election in 1946 and 1947. State and city proposals voted upon are summarized. City bond-issue proposals voted upon are also presented in more detail in table 404, p. 389. The number of registered voters in 1942 in each city of 25,000 inhabitants or more is given in the Cities Supplement to the Statistical Abstract.

No. 332.—Vote for Presidential Electors, by Major Political Parties: 1888 то 1944

## No. 835.—Apportionment of Congressional Representation, by States, From Adoption of Constitution to 1940

[Until 1940, population for apportionment purposes excluded Indians not taxed and, until 1870, two-fifths of slaves. In 1940, all Indians were held subject to Federal taxation. Until 1850, apportionment ratios chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by number of Representatives; from 1910 on, apportionments computed from priority lists, not from ratios. No apportionment in 1920. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., "A Survey of Methods of Apportionment in Congress," by Edward V. Huntington]

<sup>1</sup> In some districts one or the other of the major parties had no candidates.
2 No representatives were elected from districts, but more than one was elected from the State at large in Arizona, New Mexico, and North Dakota. In these States each total is the sum of votes cast for that candidate of each party receiving the highest vote.
3 In California a person may be the candidate of one or more parties for the same office, so that party votes for candidates are not segregable. The party vote shown is computed by assigning to a party the total of votes for candidates who are members of that party.
4 Democratic-Farmer-Labor party.
5 Included in "other" are 416,247 American Labor, 161,209 Liberal, and 4,457 Good Government votes cast for Democratic candidates, and 435 Jeffersonian votes cast for a Republican candidate.
4 Included in "other" are 240,394 American Labor, 47,138 Liberal, 708 Veterans-Farmer votes cast for Democratic candidates; 7,267 American Labor, 571 Veteran Victory, 9,761 Liberal votes cast for Republican candidates. Included among Democratic votes are 27,341 Democratic votes cast for the American Labor candidate.

7 Included in "other" are 86 independent votes cast for a Democratic candidate.

8 Segregative Democration of Company Republican Candidate.

Includes data for 18 towns and townships considered urban places under special rule of Bureau of Census; that is, 2 towns in Conn. (West Hartford and West Haven), 4 towns in Mass. (Arlington, Belmont, Brookline, and Watertown), 3 townships in N. J. (North Bergen, Teaneck, and Woodbridge), 3 townships in Pa. (Haverford, Lower Merion, and Upper Darby), and 1 town in R. I. (East Providence). Includes Richmond, Calif., on basis of special census after 1940.

Totals exclude duplications which result from fact that many proposals deal with subjects falling into more

an one category.

Includes an advisory proposal voted upon in Saginaw, Mich.

## 14. National Government Finances

The Government's proposed budget for the ensuing fiscal year is transmitted to the Congress by the President in January, and contains the President's recommendations for appropriations for the maintenance of the various departments and establishments. The Treasury Department publishes a "Digest of Appropriations" each year, which summarises appropriation legislation enacted by the Congress, and also publishes yearly the "Combined Statement of Receipts, Expenditures and Balances," which is an abstract of the books of the Treasury relating to all of the receipt and appropriation accounts of the Government.

The day-to-day financial operations of the Federal Government are reflected in the "Daily Statement of the United States Treasury," which covers all of the receipts and expenditures of the Government, including those arising under public debt operations, and also exhibits a "Statement of the Public Debt," as of the end of the month, on the first working day of the next month, and certain other special statements on the 15th day of each month. The "Treasury Bulletin," a monthly publication, contains analytical material on fiscal operations and related Treasury activities. The "Annual Report of the Secretary of the Treasury" is a convenient summary of yearly data relating to somewhat broader fields, and, in addition, contains texts of most of the public documents relating to fiscal policy and operations. The "Annual Report of the Commissioner of Internal Revenue" gives a detailed account of tax collections by kind of tax and by geographic area.

Two other special aspects of Federal finances are dealt with in the "Circulation Statement of United States Money" (monthly) and "Prices and Yields of Public Marketable Securities . . ." (monthly), both issued by the Treasury Department. See tables 409–411 and 490, pp. 398–400, and 455.

Data from income tax returns are compiled by the Bureau of Internal Revenue of the Treasury Department in accordance with Section 63 of the Internal Revenue Code, which requires the preparation and publication annually of statistics reasonably available with respect to the operation of the income tax laws. The annual report, Statistics of Income, Part 1, is compiled from data reported on individual income tax returns, taxable fiduciary income tax returns, Federal estate tax returns, and gift tax returns. Statistics of Income, Part 2, also published annually, presents data from corporation income and declared value excess-profits tax returns, corporation excess-profits tax returns, and personal holding company returns. Data from these reports appear on pages 325-358.

#### ACCOUNTS THROUGH WHICH TREASURY OPERATIONS ARE EFFECTED

All receipts of the Government are covered into the General Fund of the Treasury, from which all expenditures are made. No money may be drawn from the Treasury except in accordance with appropriations made by law.

Receipts and expenditures are classified in the Treasury's records according to the class of accounts through which operations are effected. Transactions are segregated in order to exhibit separately those effected through general and special accounts, as

contrasted with those effected through trust accounts. A brief description of the items handled through these accounts is as follows:

1. General accounts.—The principal categories of general account receipts are income taxes, miscellaneous internal revenue, employment taxes, customs, and miscellaneous receipts, such as proceeds from the sale of surplus property.

There are five classes of appropriations payable through the general accounts of the Treasury, namely: (a) annual appropriations, which are available for incurring obligations only during a specified fiscal year; (b) multiple-year appropriations, which are available for incurring obligations for a definite period in excess of one fiscal year; (c) continuing (no year) appropriations, which are available for incurring obligations until the appropriation is exhausted or until the object for which appropriated has been accomplished; (d) permanent-specific appropriations, which are fixed amounts provided for each of a series of years by permanent legislation, without annual action of Congress; and (e) permanent-indefinite appropriations, which are indefinite amounts (so much as may be necessary) provided by permanent legislation without annual action of Congress, such as the indefinite appropriation to cover interest on the public debt.

- 2. Special accounts.—Receipts in these accounts are generally funds received under special authorization of law which may be expended only for the particular purposes specified therein, and not for general purposes. The larger items have been those receipts for the reclamation fund and receipts under the Mineral Leasing Act, the national forest funds, war contributions, and deposits for defense aid under lend-lease legislation.
- 3. Trust accounts.—Trust account receipts are those received for the benefit of individuals or groups of individuals and are to be used for the purposes specified in the trust, and are not, therefore, available for general expenditures. An example of a trust account is the Federal old-age and survivors insurance trust fund, to which amounts equivalent to the receipts from the taxes on employment levied for the support of old-age benefits are automatically appropriated.

#### BASIS OF TABLES

A number of different bases are used in compiling data relating to Federal finances, as explained below, and the basis used is noted at the head of each table.

Most tables at present dealing with Federal fiscal affairs are compiled on the basis of the Daily Treasury Statement. This statement is compiled from the latest daily financial reports received from Government depositaries and Treasury offices holding Government funds, and, because of the promptness with which the information is obtained and made public, it has come into general use as reflecting the Government's finances and the condition of the Treasury from day to day. Statements for a given period compiled from the records of the agents handling Government funds may differ from the Daily Treasury Statement because of the timing difference. The Daily Treasury Statement for a given period includes items for a previous period received too late for inclusion in the Statement for that period, and does not include, of course, items not received in time for publication in the current period.

Other tables are on bases reflecting the accounts or statistics of the various Treasury offices compiling them for the definite period under review. Such other bases are the following:

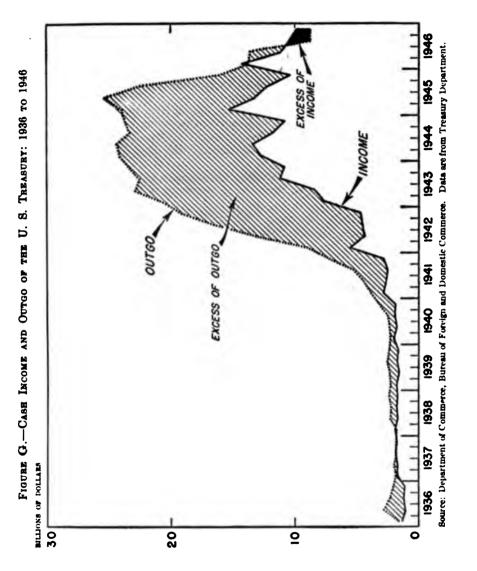

Public debt accounts.—Tables on this basis reflect the audited accounts of the Bureau of the Public Debt for the actual transactions of the period under review.

Warrants issued.—By law, warrants evidence the formal covering of receipts into the Treasury. The term when relating to expenditures merely refers to the advance of funds to disbursing officers for expenditure, and tables when compiled on this basis show expenditures considerably in advance of actual disbursement by disbursing officers.

Checks issued.—This term relates to expenditure statements made up on the basis of checks drawn by disbursing officers.

Collection basis.—Statements showing receipts on this basis are compiled from reports received by the various administrative offices from collecting officers in the field, such as actual collections recorded on their books by collectors of internal revenue and collectors of customs but without regard to the time of deposit of such collections to the credit of the Treasurer.

Further details with respect to Treasury accounting bases and procedures are shown on pages 359-361 of the Annual Report of the Secretary of the Treasury for the fiscal year 1946.

## No. 842.—RECEIPTS, EXPENDITURES, AND SURPLUS OR DEFICIT OF THE NATIONAL GOVERNMENT: 1789 TO 1946

[In thousands of deliars. On basis of warrants issued from 1789 through 1915, and thereafter on basis of daily Treasury statements except as noted. General, special, emergency, and trust accounts combined from 1789 through 1930; and thereafter trust accounts excluded. For explanation of bases and accounts, see general note on p. 311. For expenditures from trust accounts, etc., for 1944-46, see table 243]

Included in Federal Security Agency, \$22,902,000.
Omits appropriation from general funds, for deficiency, \$160,576,000.

## No. 846.—Internal Revenue Receipts, by Chief Tax Sources: 1863 to 1946

[All figures in thousands of dollars. Represents collections by internal revenue officers throughout country, including deposits by postmasters of amounts received from sale of internal revenue stamps and deposits of internal revenue collected through outcome offices, and differs, therefore, from figures in tables 342 and 343 which represent deposits of these collections in Treasury or depositories during fiscal year concerned, there being thus an overlapping of time]

#### No. 849 .- Income Tax Returns, Individual, Estate, and Trust-Summary: 1913 то 1943

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, unaudited except to insure proper execution. Under revenue laws, individuals are required to file returns as follows: (1) Single or married, for 1913-16, those with net income of \$3,000 or over; (2) single, or married and not living with husband or wife, for 1917-24, \$1,000 or over; 1925-31, \$1,500 or over; 1932-39, \$1,000 or over; for 1940, those with gross income of \$300 or over, for 1941, \$750 or over; and for 1942 and 1943, \$500 or over regardless of amount of net income; (3) married and living with husband or wife, filing a joint return, for 1917-23, those with net income of \$2,000 or over; 1925-31, \$3,500 or over; 1932-39, \$2,500 or over; for 1940, those with gross income of \$2,000 or over; for 1941, \$1,500 or over; for 1942, \$1,200 or over; and for 1943, if gross income exceeds \$524, regardless of amount of net income; also for 1943, return is required of any person liable for tax for 1942, regardless of amount of gross income for 1943; (4) every individual with gross income of \$5,000 or over for 1921-39, and as stated above for 1940-45. Data for returns showing no net income, filed in accordance with these latter prosisions, are not included in statistics shown. Fiduciaries are required to file returns on same basis as single individuals, except that a return is required for every trust having a net income of \$100 or over. Partnership net profit or net loss is reported on individual returns of copartners according to their shares]

<sup>1</sup> Net income is total income less statutory deductions, but before deduction of exemption or credits allowable

¹ Net income is total irecome less statutory deductions, but before deduction of exemption or credits allowable in computing amount subject to tax.
² Incindes war excess-profits tax of \$101,250,000 on individuals and \$103,888,000 on partnerships.
² Tax after 25 percent reduction provided by Revenue Act of 1924.
² Excludes amount of alternative tax on returns reporting deficit due to net long-term capital loss, which tax amounted to \$618,000 for 1938; \$300,000 for 1939; \$473,000 for 1940; and \$2,328,000 for 1941.
² Includes defense tax 1940, \$128,350,000; 1941, \$1,150,000; not shown separately in table. Defense tax, applicable only to taxable years beginning in 1940, is 10 percent of total income tax before deducting any credit, but not in excess of 10 percent of amount by which net income exceeds such income tax.
² (a) Represents tax computed on net income for respective year without report to comparison of tax liability on the two returns as provided by Current Tax Payment Act. Tax for 1943 is amount of income and Victory tax after deducting credits for tax paid at source and tax paid to a foreign country or possession of United States, which credits for 1943 amounted to \$18,803,000 for individuals, estates, and trusts. Tax for 1942 and prior years is amount before deduction of such credits.

which credits for 1943 amounted to \$16,803,000 for individuals, estates, and trusts. Tax for 1942 and prior years is amount before deduction of such credits.

(b) Total tax reported on 1943 returns of individuals, estates, and trusts, with net income, including adjustments under Current Tax Payment Act and after deducting credits referred to in (a) above, is \$17,114,112,000 which includes total tax on 1943 income (see (a) of this note), additional tax of \$87,88,000 on individual returns showing 1943 tax increased to equal 1942 tax liability, and unforgiven portion of 1942 and 1943 tax on individual returns amounting to \$1,853,201,000. (On returns with no net income for income tax purposes in 1943, there is a tax of \$31,800,000 which is not included in total shown above. This excluded tax consists of (1) adjustments under Current Tax Payment Act on individual returns, and (2) Victory tax on returns of individuals, estates, and trusts.)

<sup>&</sup>lt;sup>1</sup> Total number of returns, amount of net income, and amount of tax for 1943, distributed by States, do not precisely agree with totals shown in other tables presented herein for individual returns excluding estates and trusts, for the reason that State data are extended from a composite sample including the basic sample used in general tables and a supplemental sample to insure representative State data.

<sup>2</sup> (a) Tax on 1943 income is that computed on net income reported for 1943, without regert to comparison with tax on individual returns for 1942 as provided by Current Tax Payment Act, and consists of normal tax, surtax, alternative tax, and Victory tax, after deduction of credits for tax paid at source and tax paid to foreign countries or United States possessions. See note 1.

AND TRUST, BY STATES AND TERRITORIES: 1941, 1942, AND 1943 and tax per capita, in thousands of dollars]

## No. 856.-Income Tax Returns, Corporation-Summary: 1916 to 1943

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, unaudited except to insure proper execution. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Under the Revenue Act of 1934, the privilege of filing a consolidated return for a group of affiliated corporations was limited to common carriers by railroad and their related leasing and holding companies. The Revenue Act of 1936 extended this privilege to street, suburban, and interurban electric railway corporations. These changes result in marked differences between returns for 1934 through 1941, and those for 1933 and prior years, in net-income or deficit classification and in size of total assets, as well as in distribution by industries. Tables showing effect on tabulated data of discontinuance of consolidated returns except by railroad corporations appear in Statistics of Income for 1934, Part 2. Beginning 1942, the consolidated-return privilege is again extended, in general, to all corporations. Corporations are classified industrially on the one business activity which accounts for the largest percentage of total receipts. Therefore, industrial groups do not reflect pure industry classifications. As a result of application of Standard Industrial Classification, the number of major and minor industrial groups for 1938 and subsequent years has been increased over that for 1937 and prior years. Changes in contents of groups are listed in Statistics of Income for 1838, Part 2; subsequent changes appear in later volumes]

1 Returns of inactive corporations prior to 1927 are included in those reporting no net income.

§ For 1922-32, and for 1940-43 net income tabulated is amount before deduction due to net operating loss of prior year. (For amount of such loss allowed as a deduction from net income in computing taxable income for 1930-32, and for 1940-43, see table 361, p. 345.) For 1935 and prior years, net income or deficit is amount reported for income tax computation. For 1936 and later years, net income or deficit is amount reported for (declared value) excess-profits tax computation and includes dividends received on stock of domestic corporations subject to taxation under the effective Federal tax law, and interest received on certain Government obligations subject to excess-profits tax. Beginning 1936, contributions or gifts are deductible in arriving at net income and are limited to 5 percent of net income before such deduction.

§ Tax credit for taxes paid to foreign countries, allowable for 1918 and subsequent years, has not been deducted from amounts of income tax as tabulated.

§ War-profits and excess-profits taxes provided by Revenue Acts of 1917, 1918, and 1921 were in effect 1917-21.

from amounts of income tax as tabulated.

4 War-profits and excess-profits taxes provided by Revenue Acts of 1917, 1918, and 1921 were in effect 1917-21; amount shown for 1922 was reported on returns with fiscal years beginning in 1921; and (declared value) excess-profits tax under NIRA was in effect for 1933 and subsequent years. Figures for 194-43 also include excess profits tax under Second Revenue Act of 1940. Amounts for each year are shown in table 357, amounts for 1942-43 being after (1) the credit for debt retirement, (2) net post-war refund, (3) relief adjustments claimed on return when filed, and before changes which may result from (1) carry-backs, (2) relief granted under section 722, and (3) renegotiation of war contracts, after returns were filed.

5 For 1935-38, includes surtax on undistributed profits according to provision of Revenue Act of 1936. Amount included for 1938 is that reported on fiscal year returns with taxable year beginning in 1937.

6 Includes income and declared value excess-profits defense tax. Amount included for 1941 is from returns with fiscal years beginning in 1940.

\* Includes moone and declared value excess-pronts defense tax. Amount included for 1921 is from returns when fiscal years beginning in 1940.

7 (a) For 1942-43, income and taxes as shown do not reflect effect of changes resulting from renegotiation of war contracts after returns were filed. Amounts representing reduction in profits and taxes for 1942 due to renegotiation after returns were filed are shown in Statistics of Income for 1942, Part 2. (b) Beginning 1942, instead of special deduction for reserves which was previously allowable to life insurance companies in arriving at net income, there is allowable a credit against net income. As a consequence, there is an increase in both number of returns reporting net income and in amount of net income reported.

<sup>&</sup>lt;sup>1</sup> To improve historical comparability, figures for 1938 through 1943 are adjusted by transferring certain minor groups from classification in which shown in tables 360 and 362 to the classification in which shown here for 1937 (figures in roman). Figures for 1937 in italies show adjusted amounts which would have resulted if industrial classification of 1938 and subsequent years had been in effect.

<sup>3</sup> See note 7, table 356.

<sup>5</sup> Total tax for 1942 includes \$15,723,000 excess profits tax not distributed by industrial groups.

<sup>1</sup> To improve historical comparability, figures for 1938 through 1943 are adjusted by transferring certain minor groups from classification in which shown in tables 360 and 362 to the classification in which shown here for 1937 (figures in roman). Figures for 1937 in Italics show adjusted amounts which would have resulted if industrial classification of 1938 and subsequent years had been in effect.

1 See note 7, table 336.

4 Bone, celluloid, and ivory products are included in "Manufacturing—All other," for 1938 and subsequent

years.
See note 7 (b), table 356.

No. 860.—Income Tax Returns, Corporation, by Major and Minor Industrial Groups: 1943

is in addition to income tax, includes: declared value excess-profits tax for 1933 and subsequent years; surtax on undistributed profits, 1936 through 1938, the amount for 1938 being that reported on returns with fiscal year beginning in 1937; for 1940–43, excess profits tax under provisions of Second Revenue Act of 1940; and also for 1940 and 1941, defense tax. Defense tax for 1941 is that reported on returns with fiscal years beginning in 1940.

15 Includes amortization of emergency facilities for 1940 and later years.

For items included in "Total compiled receipts" see table 362.
 Gross sales, less returns and allowances, where inventories are an income-determining factor. For "Cost of goods sold," see "Compiled deductions."
 Where inventories are not an income-determining factor. Figures for years prior to 1932 represent gross profits from operations other than trade and manufacturing.
 For 1930-33 consists of wholly tax-exempt interest on obligations of States, Territories, or political subdivisions thereof, or the District of Columbia; securities issued under the Federal Farm Loan Act or such act as amended; and obligations of the United States or its possessions; for 1934 through 1943 includes in addition to the wholly tax-exempt interest, that which is partially tax-exempt. Interest on Treasury notes issued on or after Dec. 1, 1940, and obligations issued on or after Mar. 1, 1941, by the United States or any agency or instrumentality thereof, is wholly taxable and is included in "Other receipts" for 1941-43.
 Included in "Other deductions" prior to 1933.
 Beginning 1936 "Dividends from domestic corporations" are taxable income tabulated with "Other receipts."
 Includes contributions or gifts (limited to 5 percent of net income before deduction of contributions or gifts).
 See note 7, table 356.
 See note 13, table 362.
 Compiled receipts less compiled deductions.
 Bee note 2, table 356, and note 5, table 366.
 Deducted by corporations reporting net income.
 In addition to income tax, includes: declared value excess-profits tax for 1933 and subsequent years; surtax

and Treasury bonds owned in principal amount of \$5,000 or less, issued prior to Mar. 1, 1941.

19 "Net capital gain" is net amount of gain arising from sale or exchange of capital assets. See source for definitions of terms. (A net loss from such sales or exchanges is not deductible for current year, but may be carried

subject to allowance for depreciation.

Includes taxes which are reported in "Cost."

Recludes (1) Federal income tax and Federal excess-profits taxes; (2) estate, inheritance, legacy, succession, and gift taxes; (3) income taxes paid to a foreign country or possession of U. S. If any portion is claimed as a tax credit; (4) taxes assessed against local benefits; (5) Federal taxes paid on tax-free covenant bonds; and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

Limited to 5 percent of net income as computed without benefit of this deduction.

Deduction due to net operating loss carry-over from two preceding taxable years.

<sup>\*</sup> Compiled net loss or deficit.

Federal land banks, joint-stock land banks, and Federal intermediate credit banks; and U. S. savings bonds and Tressury bonds owned in principal amount of \$5,000 or less, issued prior to Mar. 1, 1941.

"Net capital gain" is net amount of gain arising from sale or exchange of capital assets. See source for definitions of terms. (A net lose from such sales or exchanges is not deductible for current year, but may be carried over and applied against capital gains in five succeeding taxable years.)

"Net amount of gain or loss arising from sale or exchange of property used in trade or business, of a character subject to allowance for depreciation.

Includes taxes which are reported in "Cost."

Excludes (1) Federal income tax and Federal excess profits taxes, (2) estate, inheritance, legacy, succession and gfit taxes, (3) income taxes paid to a foreign country or possession of the U. S. If any portion is claimed as a tax credit, (4) taxes assessed against local benefits, (5) Federal taxes paid on tax-free covenant bonds, and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

"Limited to 5 percent of net income as computed without benefit of this deduction.

"Deduction due to net operating loss carry-over from two preceding taxable years.

Federal land banks, joint-stock land banks, and Federal intermediate credit banks; and U. S. savings bonds and Treasury bonds owned in principal amount of \$5,000 or less, issued prior to Mar. 1, 1941.

19 "Net capital gain" is net amount of gain arising from sale or exchange of capital assets. See source for definitions of terms. (A net loss from such sales or exchanges is not deductable for current year, but may be carried over and applied against capital gains in 5 succeeding taxable years.)

11 Net amount of gain or loss arising from sale or exchange of property used in trade or business, of a character subject to allowance for depreciation.

12 Includes taxes which are reported in "Cost."

13 Excludes (1) Federal income tax and Federal excess-profits taxes, (2) estate, inheritance, legacy, succession, and gfit taxes, (3) income taxes paid to a foreign country or possession of U. S. if any portion is claimed as a tax credit, (4) taxes assessed against local benefits, (5) Federal taxes paid on tax-free covenant bonds, and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

14 Limited to 5 percent of net income as computed without benefit of this deduction.

15 Deduction due to net operating loss carry-over from 2 preceding taxable years.

<sup>18 &</sup>quot;Net capital gain" is net amount of gain arising from sale or exchange of capital assets. See source for definitions of terms. (A net loss from such sales or exchanges is not deductible for current year, but may be carried over and applied against capital gains in 5 succeeding taxable years.)

11 Net amount of gain or loss arising from sale or exchange of property used in trade or business, of a character subject to allowance for depreciation.

12 Excludes (1) Federal income tax and Federal excess profits taxes, (2) estate, inheritance, legacy, succession, and gift taxes, (3) income taxes paid to a foreign country or possession of U. S. if any portion is claimed as a tax credit, (4) taxes assessed against local benefits, (5) Federal taxes paid on tax-free covenant bonds, and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

14 Limited to 5 percent of net income as computed without benefit of this deduction.

15 Deduction due to net operating loss carry-over from two preceding taxable years.

16 Compiled net loss or deficit.

17 See note 3, table 360.

18 See notes 4 and 5, table 360.

### No. 363.—Gross Income of Corporations, by Industrial Groups: 1936 to 1943

[In millions of dollars. Gross income is less than total compiled receipts by amount of wholly tax-exempt interest on Government obligations for 1940 and prior years, and by sum of wholly tax-exempt interest and interest subject to surtax only, for 1941-43. For items comprising "total compiled receipts," see table 362. See also headnote and footnote 7, table 356]

<sup>1</sup> Excludes returns with fragmentary balance sheet data.
2 Adjustments are made in tabulating data as follows: (1) Reserves for depreciation, depletion, amortization, and bad debts, when reported under liabilities are used to reduce corresponding asset account, and "Total assets" and "Total liabilities" are decreased by amount of such reserves; and (2) a defict in surplus, reported under assets, is transferred to liabilities, and "Total assets" and "Total liabilities" are decreased by amount of deficit.
5 Cash in till and deposits in banks.
5 Consists of obligations of United States or any agency or instrumentality thereof; obligations of States, Territories, and political subdivisions thereof, District of Columbia, and United States possessions.
6 For bance sheets in which common and preferred stock are not reported expenses.

For balance sheets in which common and preferred stock are not reported separately, combined amount is tabulated as "Common stock."
 Beginning 1937, excludes "Surplus reserves."
 Consists of sum of positive amounts of "Paid-in or capital surplus," "Earned surplus and undivided profits," and "Surplus reserves."
 Consists of negative amounts for "Earned surplus and undivided profits."

¹ For 1940-42, return is required of every citizen or resident of U. S. who transferred by gift during calendar year to any one donee, property exceeding \$4,000 in value or who, regardless of value, made a gift of future interest in property or a gift in trust; for 1943, return is required for transfer of property by gift, including gifts in trust, exceeding \$3,000, or for gift of future interest in property, regardless of value. A nonresident alien is similarly required to file return if gift consists of property situated in United States.
² There is allowed exclusion of first \$4,000 of gifts made to any one donee during any calendar year 1940-42, except gifts in trust or of future interest in property; for 1943, there is allowed exclusion of first \$3,000 of gifts made to any one donee during calendar year except gifts of future interest in property.
² Specific exemption of \$40,000 for 1940-42 or of \$30,000 for 1943 may be taken in 1 year or spread over a period of years at option of donor. The specific allowed each year is \$40,000 (for 1940-42) or \$30,000 (for 1943) less the sum of amounts claimed and allowed in prior years. ⁴ Includes defense tax.

### No. 368.—Estate Tax Returns, Federal—Summary: 1929 to 1944

[All memory figures in thousands of dollars. An estate tax return is required to be filled (1) for estate of every citizen and resident alien who died (a) in period Sept. 9, 1916, through 10:24 a. m., Feb. 26, 1926, or in period 5 p. m., Jume 6, 1932, through Aug. 30, 1935, the value of whose gross estate exceeds \$50,000; (b) in period 10:25 a. m., Feb. 26, 1926, through 4:59 p. m., Jume 6, 1932, the value of whose gross estate exceeds \$100,000; (c) in period Aug. 31, 1935 through Oct. 21, 1942, the value of whose gross estate exceeds \$40,000; and (d) on or after Oct. 22, 1942, the value of whose gross estate exceeds \$40,000; and (d) on or after Oct. 22, 1942, the value of whose gross estate exceeds \$40,000; and (d) on or after Oct. 22, 1942, only if gross estate situated in U. S., at date of death; and (b) on or after Oct. 22, 1942, only if gross estate situated in U. S., at date of death exceeds \$20,000. The estate of an individual who died after 5 p. m., June 6, 1932, is subject to 2 Federal estate taxes—basic tax and additional tax. Basic tax is computed at rates provided by act in force at date of death, over basic tax. of tentative tax computed at rates provided by act in force at date of death, over basic tax]

<sup>1</sup> Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

Source of tables 367 and 368: Treasury Department, Bureau of Internal Revenue; Statistics of Income, Part 1.

Excludes returns for estates of nonresident citizens who died prior to May 11, 1834.
 Includes returns for estates of nonresident citizens who died prior to May 11, 1834.
 Net taxable estate for 1933 and subsequent years is net estate for additional tax plus regular net estate for returns filed under the 1936 and prior acts. Tax shown is total net estate tax liability—the sum of net basic tax and net additional tax—and includes defense tax (10 percent of net tax) effective only for estates of individuals who died in period June 26, 1940 through Sept. 20, 1941.

Figures for 1800-50 are as of Jan. 1.

Revised in accordance with Bureau of Census estimated population for continental United States as of July 1 of each year beginning 1850.

Excludes bonds issued to Pacific railways and Navy pension fund.

Includes old demand notes; U. S. notes (gold reserve deducted since 1900); postal currency and fractional currency less amounts officially estimated to have been destroyed; and also deposits held by Treasury for various purposes. Excludes gold, silver and currency certificates, and Treasury notes of 1880 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.

Less than \$500,000.

Includes old Treasury (war) saving securities for 1920 and 1925.

#### No. 871.—Net Debt in the United States: 1916 to 1945

[Net public and private debt outstanding is a comprehensive estimate of the indebtedness of borrowers after the deduction of duplicating corporate and government debt from the gross totals. Gross debt is defined to include all types of debt, irrespective of form, origin, duration, or ownership, except (1) the deposit liability of banks and the amount of bank notes in circulation; (2) the value of outstanding policies and annuities of life insurance and the amount of bank notes in circulation; (2) the value of outstanding policies and annuities of life insurance companies; (3) the short-term debts outstanding between individuals or mincorporated non-financial business firms; and (4) the nominal debt of nonrallway corporations, such as bonds which are authorised but unissued or outstanding but reacquired. To obtain the net debt figures, gross or total debt estimates are corrected for duplications within the following sectors of the economy: (1) the Federal Government and its corporations and agencies, (2) the combined State and local governments, and (3) the corporate system and within the corporate system, those related but legally separate corporations operating under a single management and treated as a unit. In the sphere of public debt two types of adjustments are made. Public debt is reduced to a net basis by consolidating the accounts of the Federal Government with those of its corporations and agencies and by eliminating the indebtedness of Federal, State and local governments held by the issuing governmental units. Loans receivable from the public by covernment agencies are offset against the public debt, since these loans represent an intermediary function analogous to that of the banking system and are already counted in private indebtedness. In the sphere of corporate indebtedness, obligations held by the issuer and debts of corporations to other corporate members of the same affiliated system are eliminated. In the noncorporate and individual sphere, figures are gross throughout with no adjustments. The net debt figures give a more significant picture of trends in the debt structure than the crude gross debt estimates, since the effects of changing financial organization are in large part removed. With the exception of State and local governments, where figures are for June 30 of each year, estimates represent balances of debts outstanding at the end of calendar years, corrections having been made wherever fiscal and calendar years of debts out

### No. 878.—Interest-Bearing Governmental Securities—Estimated Owner-SHIP OUTSTANDING, BY ISSUER: 1938 TO 1946

[Figures represent par values with following exceptions: (1) Holdings of commercial and mutual savings banks of securities of Federal instrumentalities not guaranteed by U. S. and of State and local governments, territories, and possessions are book values, (2) holdings of these securities by individuals are residuals, and so deviate from par values in those cases where figures for commercial and mutual savings banks are book values, (3) in the case of data which include U. S. savings bonds, Series A-D, E, and F, figures for these bonds represent current redemption values]

[Par value. In billions of dollars]

<sup>1</sup> Includes partnerships, personal trust accounts.
2 Includes sayings and loan associations, dealers and brokers, and investments of foreign balances in this coun-

Tresury statement basis. Includes special issues to Federal agencies and possessions.

Data on daily Treasury statement basis. Includes special issues to Federal agencies and trust funds, and excludes guaranteed securities held by Treasury and transactions in Commodity Credit Corporation demand obligations which had not been reported in time for inclusion in statement published in Daily Treasury Statement for fiscal year.

Less than \$50 million.

No. 879.—Interest-Bearing Securities Issued by All Governmental Units IN THE UNITED STATES-ESTIMATED AMOUNTS OUTSTANDING. BY TAX STATUS AND ISSUER: 1913 TO 1946

[U. S. Govt. data on basis of public debt accounts prior to 1920; beginning 1920, on basis of Daily Treasury Statement. "Total amount outstanding" of securities of the several issuers differs from gross indebtedness of these issuers in that former excludes noninterest-bearing debt. "Total privately held securities" differs from net indebtedness of borrowers in several additional respects. Former detrived by deducting from total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve Banks, and by public sinking, trust, and investment funds. Net indebtedness derived by deducting from gross indebtedness an amount equivalent to total volume of sinking fund assets of respective borrowers, with no allowance for any other public assets. For exceptions to par value, see table 378]

## 15. State and Local Government Finances and Employment

Statistics on finances of States and the larger cities presented in this section were procured largely by trained representatives of the Bureau of the Census and by local agents directly from information available in the fiscal offices of the States and the cities, with the assistance and cooperation of public officials. Statistics on finances of other units were obtained from State sources of central collection and by mail canvass.

In order to obtain maximum uniformity and comparability in reporting data for various units, statistics were examined and classified in accordance with standard classifications employed by the Bureau of the Census in presenting governmental statistics. Consequently, statistics as presented in Bureau of the Census reports sometimes appear in a manner different from that shown in the records of the governmental unit itself. Full definitions of the concepts used by the Bureau of the Census in reporting financial information on government and a description of the methods used in presenting the data are given in the source volumes.

Data on employees and pay rolls are from the quarterly reports, "Government Employment," formerly "State and Local Government Quarterly Employment Survey." These are based on a mail canvass of governments selected to show trends by type of unit and by population size group. Special studies, such as those on governors' messages, debt limits, or retirement systems (see tables 298-301, pp. 266-268) are prepared either from the financial and other data collected for the annual reports or from special surveys.

The Census of Governments, formerly known as Wealth, Debt, and Taxation, is conducted decennially for years ending in "2" and is designed to obtain and report the principal financial data concerning all governmental units of every type in the United States. Data from the 1942 Census are shown in this edition of the Abstract. Although some of the smaller governmental units did not report in the Census, State and national totals for the various types of units were estimated from the relatively large number of units for which data were obtained. In addition to the summary report on Governmental Finances in the United States, separate reports were published on the finances of States, cities having populations over 25,000, counties, cities having populations less than 25,000, townships and New England towns, and school districts.

The term "general government," as used in this section, covers all governmental transactions other than those of public-service enterprises. The data on general government are shown with general funds and with sinking and trust funds presented separately. Taxes collected for trust or sinking funds, however, are reported as general-fund revenues, and then as contributions from the general funds to trust or sinking funds. Revenue excludes borrowings; expenditure includes debt service—both interest payments and provision for debt retirement. The data in this section relate to the fiscal years of the respective governmental units unless otherwise specified.

<sup>&</sup>lt;sup>1</sup> Includes Federal Government and 48 State governments.

<sup>2</sup> Incorporated places having more than 2,500 inhabitants.

<sup>3</sup> The City and County of San Francisco in California and the City and County of Denver in Colorado are counted as cities and not as counties.

counted as cities and not as counties.

• Following counties are counted only as cities because they are wholly or very largely consolidated with cities indicated: Orieans Parish with New Orieans City; Suffolk County with Boston City; Bronx, Kings, New York, Queens, and Richmond Counties, with New York City; Philadelphia County with Philadelphia city.

• Counties not organized as local governments.

• County areas of Armstrong, Shannon, Todd, Washabaugh, and Washington are unorganized as counties and are attached for administrative purposes to neighboring counties.

<sup>1</sup> Sources are (a) as to revenue, U. S. Treasury Department, Combined Statement of Receipts, Expenditures, and Balances of the U. S. Government, Fiscal Year Ended June 30, 1942, pp. 25-31, and (b) as to other data, special compilation by courtesy of Bureau of Accounts, U. S. Treasury Department. Other footnotes specify adjustments in data to conform to Bureau of Census classifications so as to assure uniform and comparable reporting of Federal, State, and local Governments.

3 Includes 76 million dollars for 90 percent of total collections of railroad unemployment insurance contributions, which were credited to R. R. Retirement Board and not reported by U. S. Treasury.

4 Included in "Earnings and miscellaneous."

4 Includes veterans' sid.

4 Evaluate explicit sides in form of Sacal and new years and contributions to anterprise.

Source: Department of Commerce, Bureau of the Census; Governmental Finances in the United States, 1942.

Includes veterans and.
 Excludes capital outlays in form of fiscal aid payments and contributions to enterprises.
 Includes 12 million dollars for which detailed classification is not available.
 Not segregable in detail; included in totals.
 Omits 94 million dollars for debt retirement reported by U. S. Treasury because the payment is only nominally

an expenditure and is not a charge against revenue.

In addition, local governments are indebted for 482 million dollars of unguaranteed special assessment obligations payable exclusively by benefited property owners.

Source: Department of Commerce, Bureau of the Census; annual report, State Finances, 1945, Vol. &.

<sup>1</sup> The "general fund" of a State, as used in this table, refers to what the State itself calls its general fund; composition of funds differs widely.

1 "Net balance" is cash or its equivalent available at end of fiscal year less outstanding warrants; "surplus" is assets less liabilities and reserves at end of fiscal year.

2 Only reserves held in separate fund shown here. In some States general fund, highway fund, or both, includes certain amounts earmarked for war or postwar purposes. Distinction between general-fund or highway-fund balances and postwar reserves not always clear-cut in State financial reports.

4 Highway accounts are part of general fund.

5 New fund; none in previous year.

6 Less than 1/6 of 1 percent.

7 No change.

9 Entire available surplus in general fund and highway fund transferred to postwar-reserve fund.

<sup>1</sup> Taxes on unincorporated business, when measured by net income, are classified with "corporation income".

3 Includes poll tax collections. In only 6 States is poll tax imposed as franchise prerequisite: Ala., Ark., Miss., 8. C., Texas, and Va. Ark. and 8. C. figures for poll tax collections not available.

3 Estimated amount of \$14,675,000 for corporation income tax for Ariz., Ga., N. Mex., and Okla. is shown deducted from total individual income tax, except for allowance of estimated amount for N. H. No estimate made for Ark. and Mo.

4 Corporation income tax is tabulated with individual income tax; segregation not available. See footnote 3.

5 Not entirely complete, but except for Ind., N. J., and S. C., apparently only small amounts are missing.

6 Not entirely complete.

7 Back taxes.

8 Comprises \$2,17,000 on banks and finance companies and \$16,299,000 from the new Soldiers' Bonus excise tax and additional surtax on corporations.

8 Not available.

10 Includes property taxes on public utilities; segregation not available.

Less than sum of State and local debt by \$37 million, amount of duplicating State long-term debt for reloan to local governments.

2 Under a temporary law, \$177 million of debt of New York cities is serviced by State aid.

Comprises debts both for general purposes and for government enterprises.
 Beginning 1932, totals are less than sum of State and local public debt by amount of duplicating State debts for reloan to local governments.

<sup>&</sup>lt;sup>1</sup> Estimates of Federal employment are from Bureau of Labor Statistics. This total differs from that shown in table 306 because of exclusion of civilian employees stationed outside of continental U. S.

<sup>8</sup> Sample design for State and local government employment provided for estimates of total number of school and nonschool employees for the United States with a relative sampling error of 1 percent. It provided for State estimates of these employment characteristics with a relative sampling error of 5 percent. To the extent that full reporting from the sampled units was not achieved, estimate may be subject to somewhat larger relative errors than those called for by original design.

<sup>8</sup> Less than 500.

### 16. Banking and Finance

#### MONEY AND BANKING

Banking and monetary system.—Collection of banking and monetary statistics in the United States has been conditioned by the development of our banking and monetary system. Banks in this country are organized under the laws of both the States and the Federal government. "National" banks organized under Federal law, passed in 1863, are supervised by the Comptroller of the Currency, and State-chartered banks are supervised by officials of the respective States. The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. The Reserve System includes national banks and such State banks as voluntarily join the System. The Federal Deposit Insurance Corporation, established on January 1, 1934, insures each deposit account up to \$5,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund.

Condition of banks.—Statistics showing the condition of banks are collected by the various agencies responsible for the supervision of banks. Subdivision of the field among these agencies and the increasing adoption of practically uniform report schedules has made it possible for these agencies to compile the data with little duplication.

The Comptroller of the Currency, who has charge of the supervision of national banks, has collected condition reports since 1864 from these banks from three to six times annually and has tabulated and published summaries of these reports, showing the principal assets and liabilities, that is, total loans, United States Government securities, other securities, reserves, bankers' balances, interbank deposits, other demand deposits, and time deposits. National bank statistics are published in detail in the Abstract of Reports of National Banks (usually three times a year). The call report data are also published in the annual reports of the Comptroller although the detailed breakdown of assets and liabilities is slightly different than in the abstracts. The Comptroller obtains from the various State authorities the totals of condition reports for banks chartered by each State and publishes in his annual reports comprehensive and detailed statistics for all active banks in the United States as of end-of-December dates, classified by types of banks and by States.

After the Federal Reserve System was established in 1914, State bank members of the Federal Reserve System began to submit to the Federal Reserve banks their statements of condition at the same time and in substantially the same form as national banks. These have been consolidated by the Federal Reserve Board with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the Federal Reserve System, and are published in detail by the Board of Governors of the Federal Reserve System in the Member Bank Call Report (usually three times a year) and in summary form in the Federal Reserve Bulletin. Banking and Monetary Statistics, which was published in 1943 by the Board of Governors of the Federal Reserve System, makes available in one volume and on a uniform basis statistics of banking, monetary, and other financial developments. The statistics generally cover the period beginning with 1914.

Since the establishment of the Federal Deposit Insurance Corporation in 1934, insured banks not members of the Federal Reserve System have been reporting their condition for the end of June and December in the same manner as member banks, and consolidation of all these reports gives totals for all insured banks, which cover all but a small part of the commercial banking in the country. Annual figures by States

for the banks not covered by the regular call reports of the Federal Deposit Insurance Corporation, mainly mutual savings banks, are compiled and published by the Comptroller of the Currency, the Federal Reserve Board, and the Federal Deposit Insurance Corporation.

Statistics of the Postal Savings System, which is under the management of the Post Office Department and which performs certain banking functions, are available monthly in the Federal Reserve Bulletin and annually in the Report of Operation of the Postal Savings Systems.

Currency.—Currency includes coin and paper money issued by the Government and by banks. It represents a relatively small part of the total media of exchange in the United States, for most of it is held in the form of bank deposits and most money payments are made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official Treasury Circulation Statement) refers to all coin and paper money outside the Treasury and Federal Reserve banks, with the exception of gold and silver coin known to have been exported and, beginning with January 31, 1934, all gold coin. It includes all coin and paper money held by the public in the United States whether in current active use or held idle—also some currency which strictly speaking, is not a part of the money supply in the hands of the public, that is, cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers and not appearing in the official gold and silver export figures. The Federal Reserve Board derives a monthly figure for "currency outside banks" by subtracting from the Treasury "circulation" figure an amount representing vault cash held by commercial and mutual savings banks, and this figure more nearly approximates true circulation. Historical data on the stock of money and money in circulation may be found in the Annual Report of the Secretary of the Treasury.

Government credit agencies.—Except for the Federal land banks, Federal intermediate credit banks, and a few other agencies, including the war emergency organizations, most of the credit agencies of the United States Government were created in 1932-34 to meet specific financial problems precipitated by the depression. At the present time, there are over 35 active agencies, including the Reconstruction Finance Corporation, various agricultural lending institutions, insurance agencies, and home mortgage and housing agencies.

Statistics on the principal items of assets and liabilities of Government credit agencies are published quarterly in the Daily Statement of the United States Treasury. Quarterly statements showing the assets and liabilities of Government corporations and sources and uses of funds for these agencies are published in the monthly Treasury Bulletin. Series of yearly, quarterly, and monthly statistics relating to operations of Government credit agencies are available also in the annual and other reports of individual agencies and the annual reports of the Secretary of the Treasury.

Private credit agencies other than banks.—In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Federal Home Loan Bank Administration. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by the Spectator Company, which also publishes statistics on other types of insurance. Federal credit unions are under the supervision of the Federal Deposit Insurance Corporation and statistics on them are compiled and published by that organization. These data are combined with information on credit unions other than Federal by the Bureau of Labor Statistics and published in the Monthly Labor Review. (See table 454.) Consumer credit statistics are published currently in the Federal Reserve Bulletin.

#### SECURITIES MARKETS AND CORPORATIONS

New issues and retirement of securities.—Current statistical information on new issues of securities has been provided for many years by the Journal of Commerce (since 1906), the Commercial and Financial Chronicle (since 1919) (see table 495), and the Standard and Poor's Corporation (since 1924). The statistics of the Commercial and Financial Chronicle, the most detailed and most widely used of these series, include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and the issues of foreign governments and their subdivisions. The series is deficient in information on the uses of the proceeds of new issues, showing totals only for refunding and all other purposes.

A more comprehensive series of new issues with detailed information on the intended uses of net proceeds has been compiled by the Securities and Exchange Commission on a monthly basis beginning with January 1934. (See table 496.) This series is published monthly in the Statistical Bulletin of the Securities and Exchange Commission, the Federal Reserve Bulletin, and the Survey of Current Business.

In addition, the Commission has been compiling statistics since 1933 on the volume of retirements of corporate securities and changes in security holdings of institutional groups and the public by type of issue. It is planned to make these data public in the next year.

Individuals' saving.—The Securities and Exchange Commission releases quarterly detailed estimates of individuals' saving showing the increase in their assets less the increase in their liabilities, exclusive of gains or losses from revaluation of assets. In addition to total saving, these figures show the components contributing to it, such as changes in securities, cash, insurance, consumers' indebtedness, etc. A continuous series starting with 1940 is published quarterly in a special release and in the Commission's Statistical Bulletin. (See table 432.) Revised annual estimates prior to 1940 are currently being prepared together with a write-up of the sources and methods. The Federal Home Loan Bank Administration compiles statistics on changes in selected types of individual long-term savings and publishes these data annually in their monthly publication, the Federal Home Loan Bank Review. (See table 433.)

Trading in securities.—(See tables 484–486.) Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures, reported in connection with the fees paid under Section 31 of the Securities Exchange Act of 1934, include all sales effected on exchanges except, since March 1944, United States Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily volume of trading in stocks on the New York Stock Exchange and the New York Curb Exchange.

Prior to 1934, the only available statistical data on the volume of trading in securities were the daily figures on the number of shares and the principal amount of bonds reported sold on the New York Stock Exchange and on most of the other securities exchanges. "Reported" volume of stock sales on the New York Stock Exchange represents sales in round lots reported on the ticker and does not include certain types of round-lot transactions such as stopped sales, private sales, split openings, cross transactions, and errors of omission which ordinarily amount to from five to ten percent of total round-lot sales on the Exchange.

Security price averages.—(See tables 488 and 489.) A number of indices of security prices are published regularly. Among the most widely known are the Dow-Jones averages, which provide a continuous series of common stock prices on a daily basis since 1897. This series is now based on 65 common stocks divided into 30 industrial, 20 railroad, and 15 public utility stocks. Probably the most comprehensive and detailed are the indices of the Standard and Poor's Corporation available since 1918, which are based on the Wednesday closing price of approximately 400 stocks divided

into about 70 industrial groups. Standard and Poor's Corporation also publishes a daily average of 90 stocks. Other stock price indices available on a daily basis include the New York Times indices of 50 stocks, and the New York Herald Tribune average of 100 stocks.

Current assets and liabilities of United States corporations.—The Securities and Exchange Commission publishes a quarterly series on the net working capital position of all United States corporations, exclusive of banks and insurance companies, showing the principal components of current assets and current liabilities. (See table 494.)

Abbreviated balance sheet as well as income account data for all United States corporations are available in Statistics of Income, Part 2, an annual report of the Bureau of Internal Revenue (see tables 356-366, pp. 333-356). The Securities and Exchange Commission quarterly estimates, based on sample data, supply this information currently whereas about three years elapse before the final data are available from Statistics of Income.

Among other reports of the Securities and Exchange Commission are the quarterly series on Plant and Equipment Expenditures of United States Business, prepared jointly with the Department of Commerce; the Survey of American Listed Corporations; and an annual series, Resources and Liabilities of Brokers and Dealers, started in 1946.

¹ Totals involve duplication to extent that United States notes, Federal Reserve notes, Federal Reserve Bank notes, and national bank notes, all included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1880 excluded, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.
¹ By proclamation of the president dated Jan. 31, 1934, weight of gold dollar reduced from 25.8 to 15541 grains of gold, 0.9 fine. Hence, value of gold based on \$35 per fine ounce.

\*\*Included Participal Pages 1998.\*\*

Source: Treasury Department; Annual Report of the Secretary, Circulation Statement of United States Money published monthly.

<sup>\*</sup> Includes fractional paper currency in circulation prior to 1878. 

\* Silver bullion in Treasury.

\* Includes silver bullion as follows: As of June 30: 1934, \$1,560,000; 1935, \$313,309,000; 1936, \$708,211,000; 1937, \$35,196,000; 1938, \$1,037,163,000; 1939, \$1,230,586,000; 1940, \$1,353,162,000; 1941, \$1,435,909,000; 1942, \$1,505,844,000; 1943, \$1,519,746,000; 1944, \$1,520,134,000; 1944, \$1,520,134,000; 1944, \$1,500,1946, \$1,909,000. As of Dec. 31: 1945, \$1,703,891,000; 1946, \$1,911,167,000.

#### No. 411 .- Money in Circulation, Money Held in Treasury and in Federal RESERVE SYSTEM, AND TOTAL STOCK: 1800 TO 1946

[All figures except per capits in theusands of dellars. In conformity with revisions in form of circulation statement in 1922 and 1927, figures for 1915 on have been compiled to include in holdings of Federal Reserve Banks and agents, and, hence, in stock of money, gold bullion and foreign gold coin held by Federal Reserve Banks and agents. Figures were also revised to include in holdings of Federal Reserve Banks and agents, and, hence, exclude from circulation, all forms of money held by them whether as reserve against Federal Reserve notes or otherwise. See also headnote, table 410. Per capita figures for 1800-40 based on Bureau of Census population figures for continental U. 8. on census dates. Per capita figures for 1850-1946 revised in accordance with Bureau of Census estimated population for continental U. 8. as of July 1 and Dec. 31]

l Gold and silver certificates and Treasury notes of 1890 excluded before combining money outside Treasury with money in Treasury in order to avoid duplication, since gold and silver held in Treasury as security against these currencies are included. See also notes I and 2, table 410.

Both items include also reserve against Treasury notes of 1890.

Bee note I, table 409.

Includes total stock of silver dollars and subsidiary silver.

Gold certificates. Amount excluded from total since gold held as security against gold certificates is included in column, "In trust against gold and silver certificates."

## No. 412.—ALL ACTIVE BANKS—PRINCIPAL ASSETS AND LIABILITIES, BY CLASS OF BANKS: 1840 to 1945

[includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands (except 1942-45), and beginning with 1935, those in Virgin Islands and with 1938, those in Canal Zone, Guam (except 1942-44), and American Samos. Data for banks other than national for earlier years are not as of June 30 and are incomplete, especially through 1985. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years. Private banks are not included prior to 1890; statistics for private banks, except for 1934 and 1935, cover only banks under State supervision and those voluntarily reporting; for 1934 and 1935 they include also private banks which submitted reports to the Comproller of the Currency under provisions of the Banking Act of 1933]

[Money figures in millions of dollars]

<sup>1</sup> For rates for 1914 to 1921, see Statistical Abstract 1928, table 249; for 1922 to 1932, Statistical Abstract 1933, table 229; for 1933 and 1934, Statistical Abstract 1942, table 268. For rates on industrial advances authorized by see. 13b of Federal Reserve Act, which are not shown in this table, see source.

2 Rediscounts of notes, drafts, and bills eligible for discount under Federal Reserve Act, and advances secured by such paper, by direct obligations of U. S., by certain obligations guaranteed as to principal and interest by U. S., and by obligations of Federal intermediate credit banks maturing within 6 months.

3 1 percent on advances secured by Government obligations.

4 2 percent on advances secured by Government obligations maturing or callable in 1 year or less. This preferential rate eliminated in April and May 1946.

4 Advances secured to satisfaction of Federal Reserve Bank.

8 Rate of 2½ percent to other lenders (than banks) in effect until Apr. 11, 1942.

7 Reparate rate to banks eliminated.

# No. 428.—Savings Banks—Number of Depositors and Amount of Savings Deposits, Continental United States: 1820 to 1910

[Data for later years as of June 30 or about June 30. In earlier years reports were of various dates. Prior to 1900 data include both mutual and stock savings banks; beginning 1900 they are for mutual savings banks only, which in that year had about 90 percent of savings deposits in all savings banks. For figures for later years and also savings deposits in all classes of banks, see table 429]

[Denositors in thousands, deposits in millions of dollars]

YEAR	Depos- itors	Savings deposits	YEAR	Depos- itors	Savings deposits	YEAR	Depos- itors	Savings deposits

<sup>&</sup>lt;sup>1</sup> Includes deposits evidenced by savings passbooks, time certificates of deposit payable in 30 days or overtime deposits, open account, postal savings redeposited in banks, and, for some States, Christmas savings and similar accounts

ocounts.

2 Includes State, stock savings, and private banks and trust companies.

3 Combined data for other than national banks included in total.

4 For data for 1910 and earlier years from reports of the Comptroller of Currency, see table 428.

Not available.
 Not available.
 Figures include depositors for State-chartered banks in States which did not previously report depositors as follows (figures in parentheess are the number of depositors for the first year the given States reported): Beginning 1928, Ohio and Idaho (2,378,000 depositors); beginning 1931, Missouri (623,000 depositors); beginning 1932, Colorado (50,000 depositors); and beginning 1934, Indiana (286,000 depositors).
 Represents the number of savings passbook accounts.

¹ Gross saving excluding purchases of homes as well as of automobiles and other durable consumers' goods.
² Excludes net purchases by brokers and dealers or by other individuals financed by bank loans.
² New construction of 1- to 4-family nonfarm homes less net acquisition of properties by nonindividuals.
² Purchases minus change in debt.
² Purchases. Based on Department of Commerce data. Figures shown above include all new passenger cars sold in United States.
² Largely attributable to purchases of automobiles and other durable consumers' goods, although including some debt arising from purchases of consumption goods. Other segments of individuals' debt have been allocated to assets to which they pertain, vis, saving in savings and loan associations, insurance, securities, and homes.

<sup>&</sup>lt;sup>1</sup> Dec. 30.

Source: Federal Deposit Insurance Corporation, Annual Report.

<sup>&</sup>lt;sup>1</sup> Federal deposit insurance became operative Jan. 1, 1934.

<sup>2</sup> Comprises banks suspended before banking holiday, licensed banks suspended or placed on restricted basis following banking holiday, unlicensed banks placed in liquidation or receivership, and unlicensed banks granted licenses after June 30, 1933. At close of banking holiday (Mar. 15, 1933) 1,400 national banks with deposits (on Dec. 31, 1932) of \$1,942,574,000, and 225 State member banks with deposits of \$925,777,000 had not been licensed to reopen. On Apr. 12, 1933, the earliest date following the banking holiday for which corresponding data are available regarding nonmember banks, there were in the United States 1,108 unlicensed national banks with deposits of \$1,818,541,000, 152 unlicensed State member banks with deposits of \$1,317,607,000. By the end of June 1933 supervisory authorities had completed their examination of all or nearly all the banks not granted licenses immediately following the banking holiday and had authorized such of the banks to reopen as could qualify for licenses. On June 30, 1933, there remained 985 unlicensed non-member banks with deposits of \$1,028,347,000, 114 State member banks with deposits of \$239,268,000, and 1,983 non-member banks with deposits of \$2639,268,000 to be rehabilitated and reopened or to be placed in liquidation. non-member banks with deposits of \$1,063,984,000 to be rehabilitated and reopened or to be placed in liquidstion of receivership. All such banks are treated as suspensions.
